

[Xray Cloud] No permissions to execute Test Executions

This article will help when a user doesn't have permission to execute a Test.

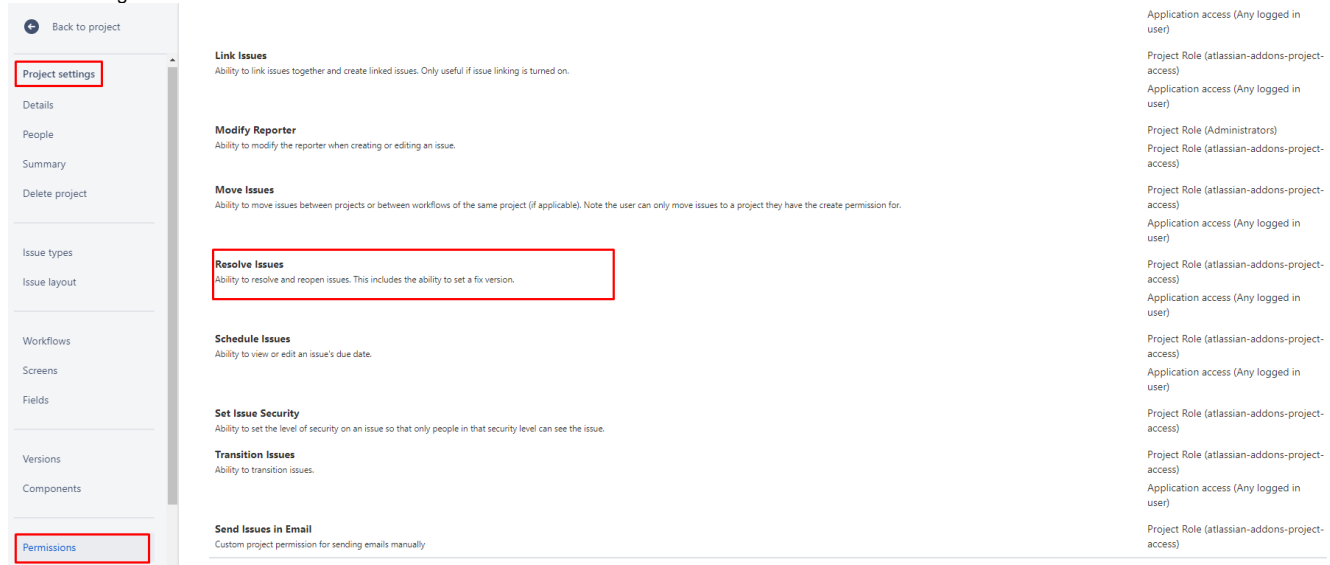

Cause 1

The User does not have the necessary issue permissions: **"Browse"** and **"Resolve"**

The user must change the **Resolve Issues Permission**:

1. Project settings
2. Permissions
3. Resolve issues

Preview image:

Cause 2

The Test Execution issue is not in a Status configured to disallow executions.

Solution

Go to Jira Settings > Apps > Xray Settings > Miscellaneous, to the option "Disallow executions of Tests with workflow statuses," and check if you have any status that does not allow users to execute the Test. ([blocked URL](#) If you have Project Settings enabled, please go to Project Settings >> Xray Settings and verify the same options there.)

When this option is enabled, the defects created in the context of a test run are automaticall

Disallow executions
of Tests with
workflow statuses

Choose the workflow statuses in which the Tests are not allowed to be executed.

Disallow executions
with workflow
statuses

Choose the workflow statuses in which the Test Execution issues will not allow executing Tests.
