

# Xray for JIRA add-on for Bamboo 1.1.0 Release Notes

## Highlights for this release

### **Fix Version specification in the Import Results task**

You can now define the Fix Version in the Test Execution whenever you import the results to JIRA.

### **Support for Bamboo remote agents**

To take advantage of Bamboo scalability, Xray for JIRA add-on for Bamboo now supports the execution of Cucumber Features Export and Results Import task in remote agents.

### **Support for JIRA instances behind self-signed SSL certificates**

Xray for JIRA add-on for Bamboo now enables the connection with JIRA servers behind self-signed SSL certificates.
