

Cloud Before you begin

Before you begin

To reproduce what is described in the following steps, you need to have your environment properly configured.

If you are a Jira admin you can follow [this quick setup](#) to set it up. If you're not an administrator you can share it with you Jira admin.

If you only want to learn more about the tool and test your knowledge in a controlled environment we would advise you to create a trial test instance in the Cloud and install the plugin as explained in the [quick setup](#)
