

# Cloud Editing a Test

As said in the beginning of this tutorial, Tests are Jira issues because of this "Editing" an issue will be the same as you do for standard issue types.

1

## Inline Editing Xray Tests

Xray Test issue sections support inline editing similar to Jira native and custom fields inline edit. This prevents full page reloads when modifying fields.

### Inline Edit Fields

To inline edit a field, just hover over the field view area and click it.

The following Test fields support inline edit:

- **Type:** The Test issue type
- **Definition:** The automated generic test definition (only visible for Generic tests)

To inline edit automated Test issues:

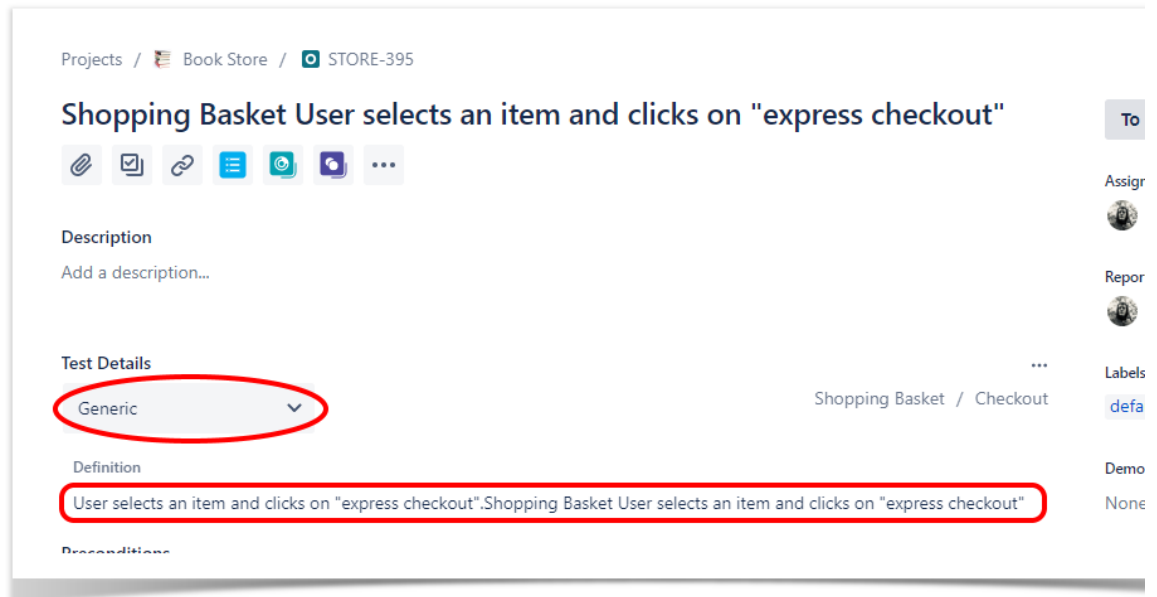

**Step 1:** If you are inline editing a **Cucumber** Test:

- You can hover over the actual **Test Type**, click it, and change it to another type that is available on the select box.
- You can hover over the **Scenario** field, click it, and edit its contents.

The screenshot displays the Jira Xray Test interface for a test titled "Test visitors can Login to Book Store Website". The interface includes a breadcrumb trail "Projects / Book Store / STORE-16". Below the title, there are icons for linking, checking, linking, adding, and more options. The "Description" section has a placeholder "Add a description...". The "Linked issues" section shows a list of tests, including "STORE-2 As a visitor, I can Login to Book Store Website". The "Test Details" section features a dropdown menu for the test type, currently set to "Cucumber", which is circled in red. Below this, the "Scenario" section shows a list of steps, which is also circled in red. The steps are: 1. Given I am not logged in, 2. And I am on the log in page, 3. When I enter my username, 4. And I enter my password, 5. And I click the login button, and 6. Then I am on logged in.

**Step 2:** If you are inline editing a **Generic** Test:

- You can hover over the actual **Test Type**, click it, and change it to another type available on the select box.
- You can hover over the **Definition** field, click it, and edit its contents.

## Manual Test Steps Table

To edit the steps of a Manual Test please check [this](#) page.

## 2

## Changing the Type of a Test

When the Type of a Test is changed, the details of the previous Info along with the associated Preconditions will be lost.

## Change test type to Generic

The current type info details will be deleted and all Preconditions will be removed from this Test. Do you want to continue?
