

Roadmap

Xray's roadmap is constantly reviewed and redefined. We update often, depending on feedback we receive from our clients and internal stakeholders.

Our release plan is available [in our Jira issue tracker](#), although account registration is required. Feel free to vote in the issues that you would like to see implemented.

Here you can find a list of features that define our main goals for future releases. This doesn't mean that other potentially smaller features won't be implemented as well.

Version 3.4

- Basic support for Risk-Based Testing
- Enhanced Xray Issue picker dialog for better searching and filtering Xray issues
- Sorting and Re-ranking Tests within a Test Execution
- Shareable reports by url
- Assign Test Runs based on user type fields available on the Test issue

Future versions

- Revamp Manual Steps UI
- Test Step fields
- Test Run fields
- Updated Add-ons for Bamboo and Jenkins
- Test Parametrisation
- Call to Test
- Dynamic Test Plans
- Support for different Test Natures
- Support Custom Test Types
- Cross-project reports
- Time Tracking
 - Calculated Time Estimates
 - Track Execution Time
- Manual Step Library
- Project Settings
