

Exporting a Folder

Document Generator allows you to get the following data from the Folder in the Test Plan Board and from Test Repository:

- [Folder Name](#)
- [Folder Path](#)

Folder Name

To get the Folder Name printed on the document you just need to use the placeholder below:

```
&{for issues}  
${Key} belongs to folder ${Folder.Name}  
&{end}
```

Folder Path

To get the Folder Path printed on the document you just need to use the placeholder below:

```
&{for issues}  
${Key} folder path is ${Folder.Path}  
&{end}
```
