

Curated list of Document Generator Templates

This page contains a curated list of Document Generator templates that are available on the (free) template store. Many more templates are available for download though, so please consider these as mere examples.

The template store can be accessed right from Xray administration under the [Document Generator section](#), from where it's possible to install a template.

Each of the following pages details the purpose of a given template, what information will be present in the generated report, and its layout.

Please note

There's also a [template store public site](#) where it is possible to browse, search for templates, and download them for further customization; if you use this page to download, and eventually customize a template, then you'll need to go to [Document Generator section](#) and manually upload your customized template.

If you use this site, the templates for Document Generator are available using under the "Xray" platform.

- [Document Generator Template: Test Report](#)
- [Document Generator Template: Test Execution Report](#)
- [Document Generator Template: Test Plan Report](#)
- [Document Generator Template: Test Runs List Report](#)
