

# Xray In-App Notifications

- [Checking notifications](#)
- [Enabling and Disabling notifications](#)
- [Notifications history](#)

Since Xray 6.4.0 users are able to receive Xray notifications such as Product Announcements, Release Updates, and others.

## Checking notifications

When a notification is sent to Xray, you can see a snippet with it on the bottom left side of the screen. Clicking on that snippet will trigger an action (such as opening a link or the notifications history widget). You can also see a floating button on the bottom right side; clicking on this floating button opens the notifications history window.

The screenshot shows the Jira Software interface with the Xray plugin. The top navigation bar includes 'Jira Software', 'Dashboards', 'Projects', 'Issues', 'Tests', 'Help', and a 'Create' button. A search bar is on the right. The left sidebar contains a 'DIGITAL LIBRARY' section with links to 'Issues', 'Reports', 'Components', 'Xray Reports', 'Xray Test Repository', 'Xray Test Plan Board', 'Automated Steps Library', and 'Add-ons'. Below this is a 'PROJECT SHORTCUTS' section. The main content area is titled 'Traceability Report' with a 'Switch report' dropdown and an 'Export' button. Below the title, there are filters for 'Scope: Version', 'Version: None - latest execution', and 'Environment: All Environments'. A 'Filter(s)' button is also present. The main content area features an illustration of a laptop with the Xray logo and a 'Generate Report' button. A notification snippet for 'Remote Jobs Trigger' is visible in the bottom left corner. The bottom right corner features a green circular button with a bell icon and a red '3' badge, indicating three notifications. The footer shows the Atlassian logo and version information.

Here is an example of the notifications history widget:

You can turn notifications "on" and "off" globally (first toggle in the image below) or select Upgrade/Information notification types (the second and third toggles in the image below).

ATLASSIAN

If you would like to disable notifications your instance, you can turn off this feature for all users from the Jira Administration > Apps > Xray > Miscellaneous. Learn more at [Miscellaneous](#).

## Notifications history

Also, on the Xray Notification Settings page, it is possible to access the notifications history that displays all the notifications that were received (see the image below for an example of the notifications history on a standalone page). You can search the contents and filter by the notification types (Information, Upgrade)
