

Xray In-App Notifications

- [Checking notifications](#)
- [Enabling and Disabling notifications](#)
- [Notifications history](#)

Since Xray 6.4.0 users are able to receive Xray notifications such as Product Announcements, Release Updates, and others.

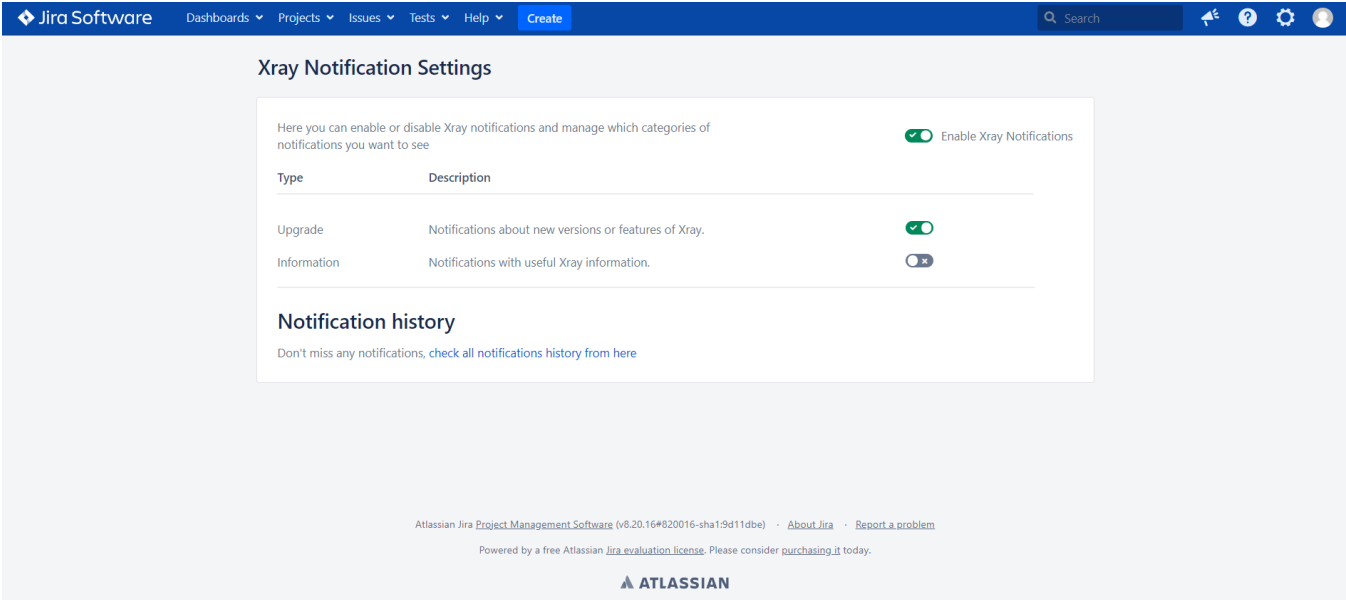

Checking notifications

When a notification is sent to Xray, you can see a snippet with it on the bottom left side of the screen. Clicking on that snippet will trigger an action (such as opening a link or the notifications history widget). You can also see a floating button on the bottom right side; clicking on this floating button opens the notifications history window.

The screenshot shows the Jira Software interface with the Xray plugin. The top navigation bar includes 'Jira Software', 'Dashboards', 'Projects', 'Issues', 'Tests', 'Help', and a 'Create' button. The left sidebar contains a 'DIGITAL LIBRARY' section with links to 'Issues', 'Reports', 'Components', 'Xray Reports', 'Xray Test Repository', 'Xray Test Plan Board', 'Automated Steps Library', and 'Add-ons'. Below this is a 'PROJECT SHORTCUTS' section. The main content area is titled 'Traceability Report' with a 'Switch report' dropdown and an 'Export' button. Below the title, there are filters for 'Scope: Version', 'Version: None - latest execution', and 'Environment: All Environments'. A large illustration of a laptop with Xray icons is shown. Below the illustration, there is a message: 'Please choose the calculation scope and set the filters above in order to generate the report.' and a 'Generate Report' button. At the bottom of the page, there is a footer with 'Atlassian Jira Project Management Software (v8.20.16#820016-sha1:9d11dbe)' and links to 'About Jira' and 'Report a problem'. A small notification snippet for 'Remote Jobs Trigger' is visible in the bottom left corner. The Atlassian logo is at the bottom right.

Here is an example of the notifications history widget:

You can turn notifications "on" and "off" globally (first toggle in the image below) or select Upgrade/Information notification types (the second and third toggles in the image below).

Notifications history

Also, on the Xray Notification Settings page, it is possible to access the notifications history that displays all the notifications that were received (see the image below for an example of the notifications history on a standalone page). You can search the contents and filter by the notification types (Information, Upgrade)
