In-App Notifications Receiving Announcements in Xray

With In-App Notifications, you can stay up to date with Xray's newest versions, features, and other information, by receiving product and release-related announcements.

When you click on the snippets showing up on the bottom left side, you are taken to that announcement detail, and by clicking on the floating button on the bottom right, you can see the history of all received announcements.

Opt-in/Opt-out

You can choose to turn off In-App Notifications selectively or totally in the "Xray Notification Settings" page accessible from your user profile menu.

You can also see the history of all received announcements on this page.

The screenshot displays the Xray application interface. The top navigation bar includes 'Jira Software', 'Your work', 'Projects', 'Filters', 'Dashboards', 'Teams', 'Apps', and 'Create'. A search bar is located on the right. The left sidebar contains a menu with options like 'Getting Started', 'Configure Project', 'Testing Board', 'SEARCH', 'Test Coverage', 'Traceability', 'Test Plans Metrics', 'Tests List', 'Test Sets List', 'Test Plans List', 'Test Executions List', and 'Test Runs List'. The main content area shows the 'Traceability Report' for 'Project: XCA testing'. It includes a 'Generate Report' button and a 'Recent Issue Trigger' notification. Below the report, there is a section for 'Xray Notifications Settings' with a table of notification categories and their status.

Type	Description	Status
Upgrade	Notifications about new versions or features of Xray.	Enabled
Information	Notifications with useful Xray information.	Enabled

At the bottom, there is a 'Notification history' section with a link to 'check all notifications history from here'.

Just one last, yet important, thing...

Documentation is always very helpful and sometimes you might miss new articles. We've added these tutorials to our extensive wiki, feel free to take a look at them:
