Manage Test Step Statuses

-
-

If you are an Xray administrator, you can create additional Test Step statuses. These statuses are applied to Test Step results. Each status can have a name, description, have a specific color and a Test Run Status.

If you delete a status and there are Test Step results in this particular status, then you'll be prompted for a migration status field to update the affected Test Steps.

Native Test Step statuses can't be modified nor deleted.

Test Step Statuses

Manage custom Test Step statuses for Xray

Name	Description	Color	Test Status	Operations
PASS	The test step has passed	■	PASS	
TODO	The test step has not started	■	TODO	
EXECUTING	The test step is currently being executed	■	EXECUTING	
FAIL	The test step has failed	■	FAIL	
BLOCKED	The test step is blocked	■	FAIL	Edit · Delete
PENDING_VALIDATION	The test step is pending validation	■	TODO	Edit · Delete

Create

Create or Modify a Custom Step Status

New Test Step statuses can be created and all existing custom statuses can be modified.

To create a new custom status, press **Create** on the **Manage Test Step Statuses** administration page. A new page will be displayed with a form containing the following fields:

- **Name**: the name for the custom field, with the following syntax: **^[a-zA-Z0-9_-/]{2,18}$**
- **Description**: the description for the custom status
- **Color**: the color for the new custom status.
- **Test Status**: the test status to map this status when calculating requirement coverage.

Create New Test Step Status

Create a new custom Test Step status

Name*	PENDING_VALIDATION
	The Test Step Status name
Description	The test step is pending validation
	The Test Step Status description
Color*	#FFAA2B
	This is the color used for the Test Step Status
Test Status*	TODO ▼
	This is Test Status that will be used in the requirement coverage calculation for Test Runs with this status.

Deleting a Custom Status

Custom statuses can also be deleted from Jira. To delete an existing custom status, press the ***delete*** link next to the status on the **Manage Test Step Statuses** administration page.

If deleting a custom status that is already associated with Test Steps, all affected Test Steps will be migrated to another status (native or custom). You will be prompted to select that new status.
