

Xray Server/Data Center and Xray Cloud

Xray for Jira Server/Data Center is a product that has been available in the Atlassian Marketplace since 2014.

Xray for Jira Cloud is an offshoot of the highly successful Xray for Jira Server. While there is great similarity between them, there are a few subtle differences between the two versions due to the way Jira Cloud works.

These are, in fact, two different products with distinct roadmaps and different release cycles. With that said, our aim is to make Xray for Jira Cloud as close to Xray for Jira Server/Data Center as possible, and improve it where possible.

Migrating from Xray Server/DC and Xray Cloud

If you are looking to migrate your Jira Server/DC instance to Jira Cloud, please take a look at our [Jira Cloud Migration Guide](#).

Feature Comparison

Below are the core differences between Xray for Jira Server/Data Center and Xray for Jira Cloud.

Feature	Xray Standard		Xray Enterprise *	
	Xray for JIRA Server/Data Center (7.2.x)	Xray for Jira Cloud	Xray Enterprise Data Center	Xray Enterprise for Jira Cloud
