[Xray DataCenter] How to setup Xray?

We'll guide you on how to configure Xray in your Data Center (DC) instance.

- Add Xray to an existent project
  - Configure Requirements & Defects
  - Enable Xray Requirement Coverage
  - Add Xray Issue Types
- Use Xray Test Project template

ⓘ Xray Addon must have been previously installed by your Jira Admin through the Atlassian Marketplace. More info **here**.
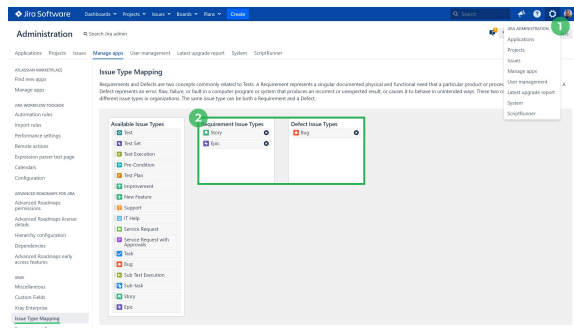

Add Xray to an existent project

Configure Requirements & Defects

1   Access "**Jira Administration**" ⚙ , and Navigate into **Xray** settings under **Manage Apps.**

2   Select the option "**Issue Type Mapping**"

Enable Xray Requirement Coverage

3   Go to your **Project Settings Summary**

4   From the top right corner select the button "**Actions**" "**Set Enable Xray Requirement Coverage**"

Your browser does not support the HTML5 video element

(Video Description: Set Enable Xray Requirement Coverage)

Add Xray Issue Types

(5)   Go to your **Project Settings Summary**

---

(6)   From the top right corner select the button "**Actions**" "**Add Xray Issue Types**"

Your browser does not support the HTML5 video element

(Video Description: Set Enable Xray Requirement Coverage)

Use **Xray Test Project** template

(1)   From the top menu, select "**Projects**" "**Create a Project**"

Your browser does not support the HTML5 video element

(Video Description: Create an Xray Test Project)
