

Test Runs Report

Shows a list of Test Runs with detailed information for each one, including related Test, Test Execution and Test Plan entities, execution dates, and linked defects.

Please note

To use this report, your project must have the Test Execution or Sub-Test Execution issue types in the issue type scheme.

Purpose

This report enables you to see which tests were or are going to be executed, along with the corresponding result and key metrics.

Possible usage scenarios:

- see all the runs of a given Test Execution
- see all the runs of all Test Executions related with a Test Plan
- see the number of opened/closed linked defects, in the context of a given run
- see the elapsed time since the execution has started
- see the executions performed by or assigned to a given user

How to use

This report is accessible from either the **Xray Reports** icon on the project left sidebar or from the standard **Reports** icon, which includes other kinds of reports besides Xray.

Source Test Runs objects can be directly provided using a Test Execution or Sub-Test Execution-based saved filter or by specifying some Test and Test Execution fields.

- **Fix Version:** the Test Execution Fix Version
- **Revision:** the Test Execution Revision
- **Test Environments:** the Test Environments of the Test Execution
- **Test Plan:** the Test Plan from the Test Execution (when the Test Execution is created within the context of a Test Plan).
- **Test Priority:** the Test Priority
- **Test Components:** Components field of the Test
- **TestRun Assignee:** the user assigned to the Test Run
- **Executed By:** the user who executed the Test Run
- **TestRun Status:** the Status of the TestRun
- **Issue Key or Summary:** Test Execution Key or Test Execution Summary sub-string.

**Please note**

Only Test Executions from the current project are taken into account.

For performance reasons, Xray limits the number of Test Runs shown to 10,000. If the number of filtered Test Runs is greater than this, then the user needs to review the applied filter in order to restrict it further.

Understanding the report columns

Metric	Notes
Test	Key of the Test associated with the TestRun
Test Summary	Summary of the Test associated with the Test Run
Components	Components of the Test associated with the Test Run
Test Priority	Priority of the Test associated with the Test Run
Test Execution	Key of the Test Execution associated with the Test Run
Test Environments	Test Environments in which the Test has been executed
Test Plan	If the Test Execution has been created in the context of a Test Plan, this column will display the Test Plan key
Test Type	Type of the Test Associated with the Test Run
TestRun Status	The status (i.e., result) of the TestRun
Executed By	User who performed the execution
Fix Version	Fix Version associated with the Test Run

Revision	Revision of the Test Execution associated with the Test Run
Started At	Date of the TestRun start
Finished At	Date of the TestRun end
Elapsed Time	Elapsed Time since the start of the TestRun. If the Status is not final, then the elapsed time will be the time between the start date and the current time.
Linked Defects	Defects directly associated with the Test Runs. Will count as unique Defects (I.e., if the same Defect issue is added multiple times in the same Test Run, it will count as one). Defects with Resolution will be counted as Closed; all others will be counted as Open
