

Global Settings: Test Step Statuses

- [Create a custom Test Step Status](#)
- [Modify a custom Test Step Status](#)
- [Deleting a custom Test Step Status](#)

As a Jira administrator, you can create additional Test Step statuses. These statuses are applied to Test Step results. Each status can have a name, description, have a specific color and a Test Run Status.

If you delete a status and there are Test Step results in this particular status, then you'll be prompted for a migration status field to update the affected Test Steps.

Native Test Step statuses can't be modified nor deleted.

Test Step Statuses

Manage custom Test Step Statuses for Xray

Name	Description	Color	Test Run Status	Operations
PASSED	The test step has passed	<div></div>	<div>PASSED</div>	
TODO	The test step has not started	<div></div>	<div>TODO</div>	
EXECUTING	The test step is currently being executed	<div></div>	<div>EXECUTING</div>	
FAILED	The test step has failed	<div></div>	<div>FAILED</div>	

Add New Test Step Status

Name*

Description

Color*

Test Status*

PASSED

This is Test Status that will be used in the test coverage calculation for Test Runs with this status.

Add

Create a custom Test Step Status

New Test Step statuses can be created and all existing custom statuses can be modified.

To create a new custom status, go to the **Add New Test Step Status** section at the bottom of the page, fill out the following fields, and press **Add**:

- **Name:** the name of the custom status, with the following syntax: `^[a-zA-Z0-9_-/]{2,18}$`
- **Description:** the description for the custom status
- **Color:** the color for the new custom status.
- **Test Status:** the Test Status to map this step status when calculating coverage.

Add New Test Step Status

Name*

SKIP

Description

The test step has being

Color*

Test Status*

PASSED

▼

This is Test Status that will be used in the test coverage calculation for Test Runs with this status.

Add

Modify a custom Test Step Status

1. Click **Edit** on the table entry corresponding to the status.

SKIP	The test step has being skipped	<div></div>	PASSED	<div>Edit</div> <div>Delete</div>
------	---------------------------------	-------------	--------	-----------------------------------

2. Change the values inline and **Save** them.

SKIP	The test step has being skipped	<div></div>	PASSED	▼	<div>Save</div> <div>Cancel</div>
------	---------------------------------	-------------	--------	---	-----------------------------------

Deleting a custom Test Step Status

1. Click Delete on the table entry corresponding to the status.

SKIP	The test step has being skipped	<div></div>	PASSED	<div>Edit</div> <div>Delete</div>
------	---------------------------------	-------------	--------	-----------------------------------

2. Confirm by clicking **Delete**.

Delete Status SKIP

Confirm that you want to remove test step status with name SKIP

Delete

Cancel

Note: If deleting a custom status that is already associated with Test Steps, all affected Test Steps will be migrated to another status (native or custom). You will be prompted to select that new status.
