

Test Runs List Gadget

This gadget provides a way to see the status of all the Test Runs of a group of Test Executions.

Test Run ID	Test Run Name	Test Run Status	Test Run Assignee	Test Run Created Date	Test Run Last Modified Date
1	Test Run 1	Passed	John Doe	2023-01-01	2023-01-01
2	Test Run 2	Failed	John Doe	2023-01-01	2023-01-01
3	Test Run 3	Passed	John Doe	2023-01-01	2023-01-01
4	Test Run 4	Passed	John Doe	2023-01-01	2023-01-01
5	Test Run 5	Passed	John Doe	2023-01-01	2023-01-01

Test Runs List
By Xpand-IT • Local

Add gadget

Test Runs List table showing test run status.

Purpose

This gadget enables you to see which Tests were or are going to be executed, along with their corresponding results.

Possible usage scenarios:

- see all the runs of a given Test Execution
- see all the runs of all Test Executions associated with a Test Plan
- see all the runs associated with a particular component
- see the executions performed by or assigned to a specific user.

How to use

Select and filter Test Execution issues with:

- **Saved Filter:** a saved filter containing Test Execution Issues. This field is mandatory
- **Start date and End date:** only Test Runs with start date and end date between this range will be considered
- **Test Run Assignee:** the Assignee of the Test Run
- **Executed by:** the user who executed the Test Run
- **Test Component:** the project component associated with the Test
- **Test Priority:** the priority of the Test
- **Test Run Status:** the status of the Test Run

It is also possible to configure the:

- **Custom Title:** specify a title for the list; otherwise, it will display "Test Runs List"
- **Number of results:** the number of results per page
- **Refresh Interval:** how often the gadget will be updated
