

Built-in Reports

Xray provides some built-in reports that can be used to analyze your project in different ways, including testing progress, current requirement statuses, and so on.

These reports are either accessible from the **Xray Reports** icon on the project left sidebar or from the standard **Reports** icon, which includes other reports besides Xray.

- [Traceability Report](#)
- [Overall Requirement Coverage Report](#)
- [Historical Requirement Coverage Report](#)
- [Test Plans Report](#)
- [Test Executions Report](#)
- [Test Runs Report](#)
