

Installation

- [Automatic Installation](#)
- [Token Based Installation](#)

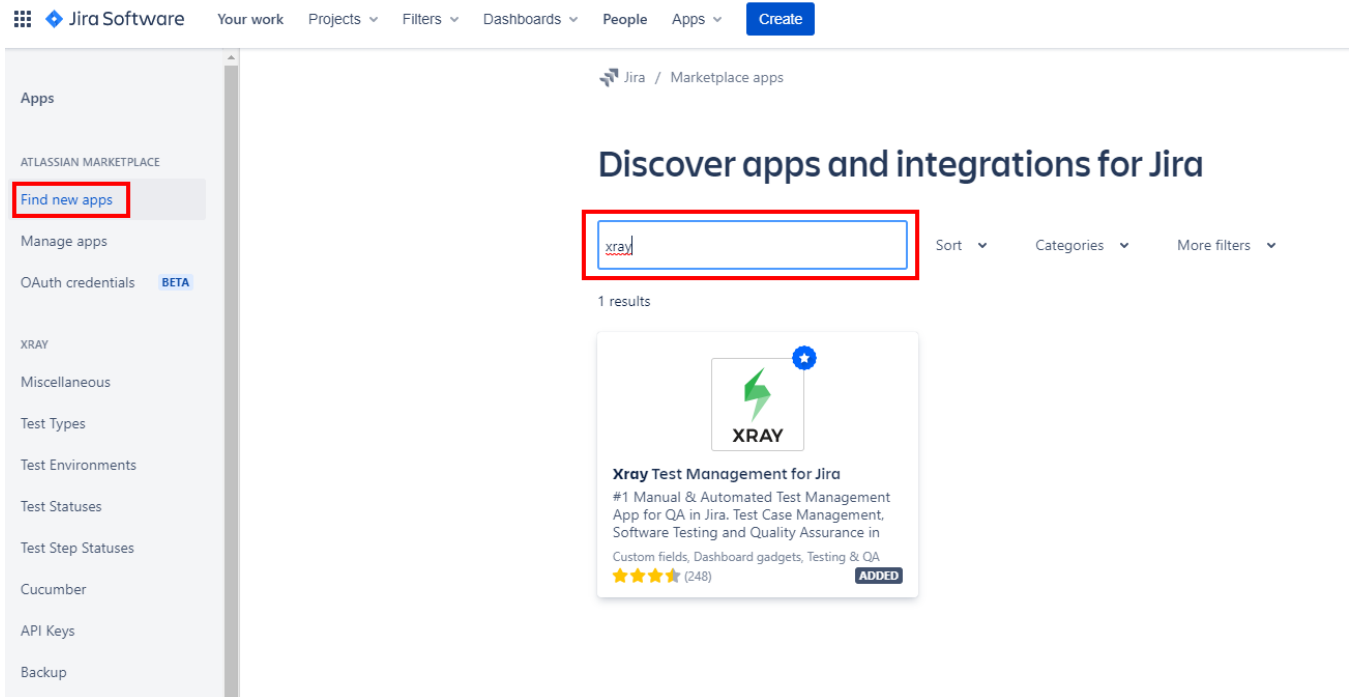

Automatic Installation

Installing Xray is easy:

1. Go to **Apps** in your **Settings** menu on the top right of the screen.

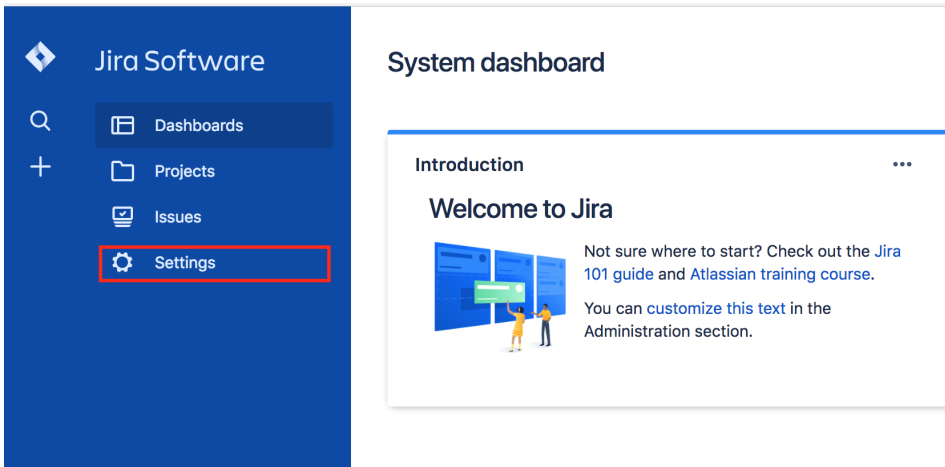

2. Go to **Find new Apps** and search for Xray:

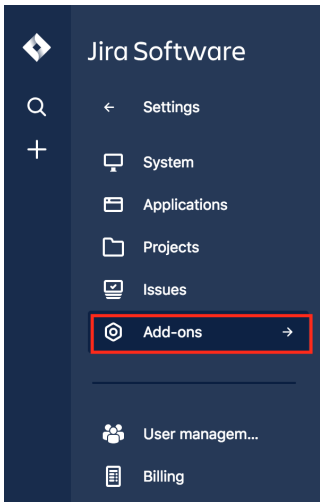

3. Congratulations, your installation is done! Please have a look at the [Quick Setup](#) instructions to move on and enjoy. 😊

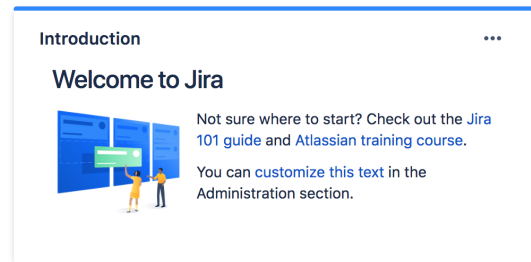

If you're using the old UI:

1. Go into the Administration section of Jira by choosing **Settings** -> **Add-ons** -> **Find new add-ons**.

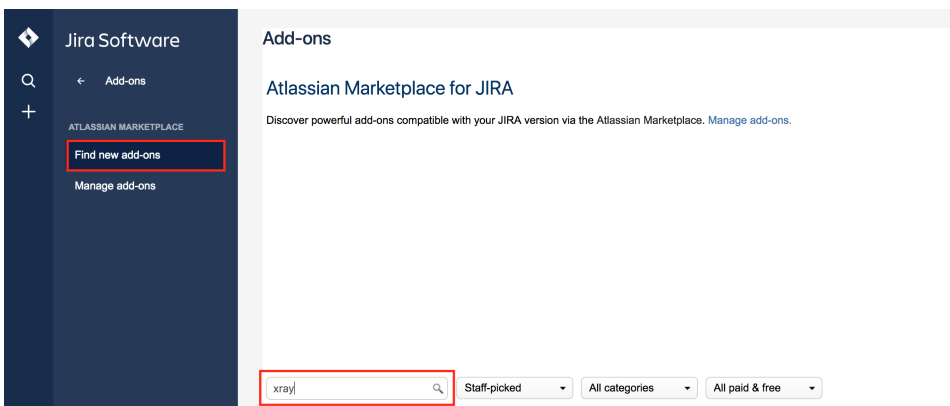

System dashboard

2. Search for Xray and click **Install**.

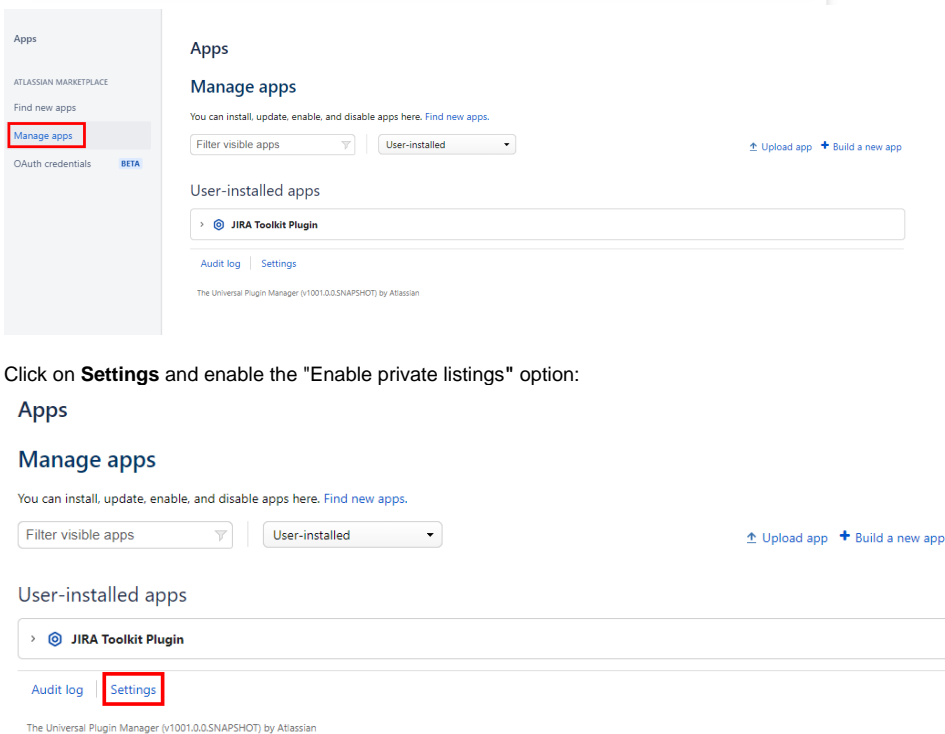

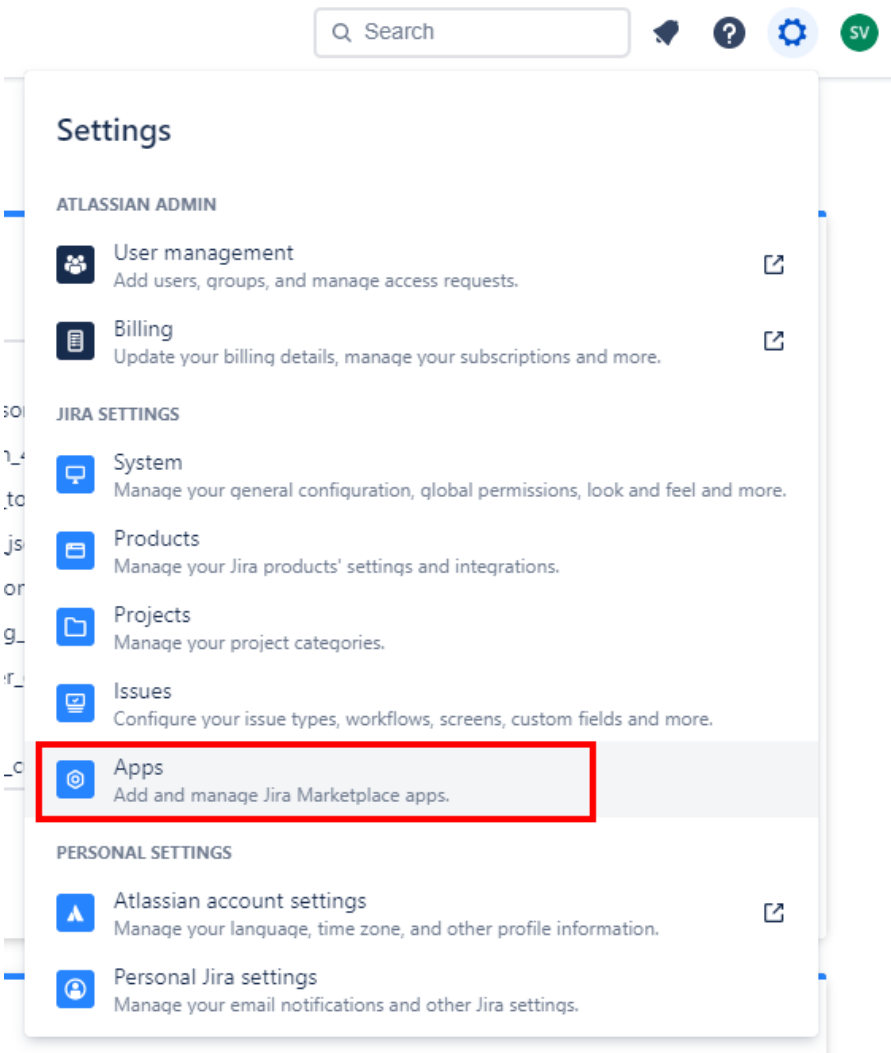

3. Congratulations, your installation is done! Please have a look at the [Quick Setup](#) instructions to move on and enjoy. 😊

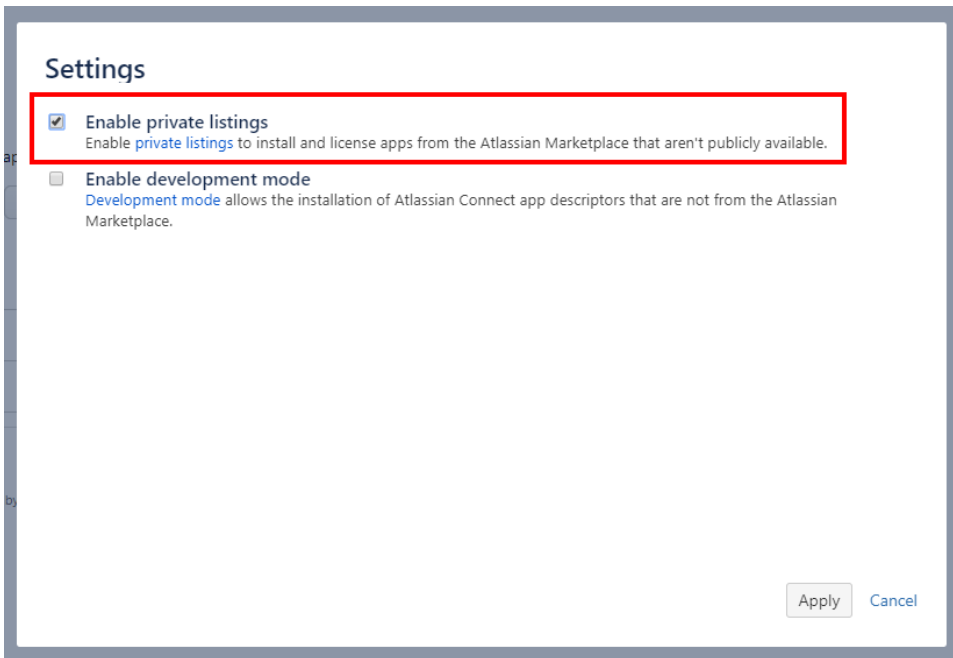

Token Based Installation

If you are provided a token by Xblend, please perform the following steps in order to do an Xray token based installation:

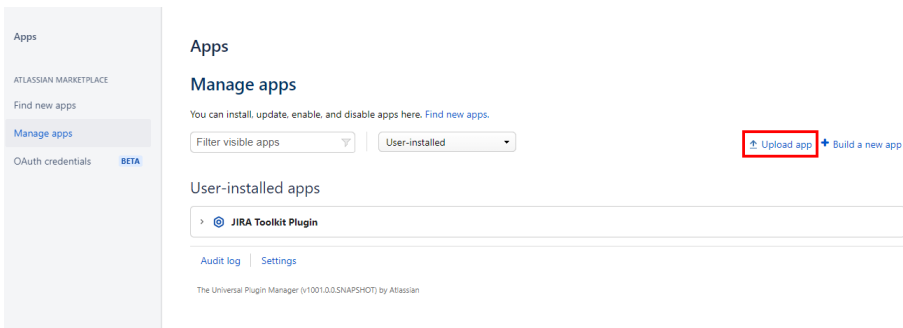

1. Make sure you have a project. If you're creating a new Jira Cloud instance, you may do it right-away during that process
2. Go to **Settings** -> **Apps** in the top left of the screen and then to Manage Apps in the menu to the right.

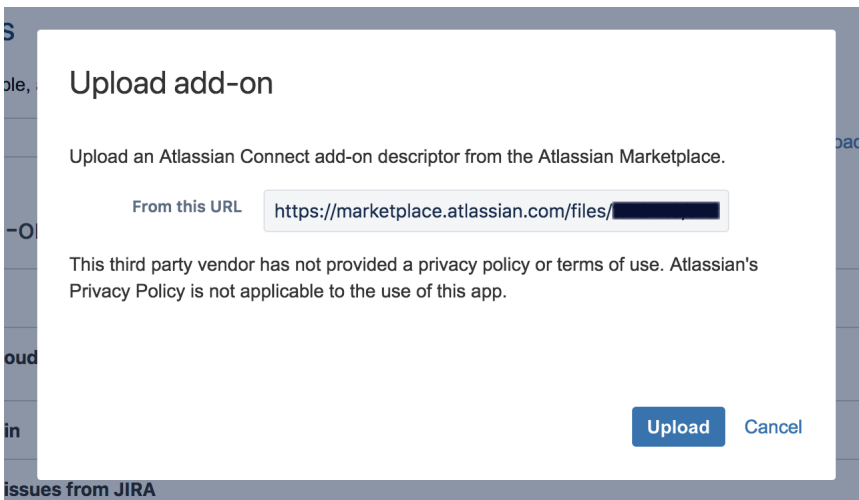

3. Click on **Settings** and enable the "Enable private listings" option:

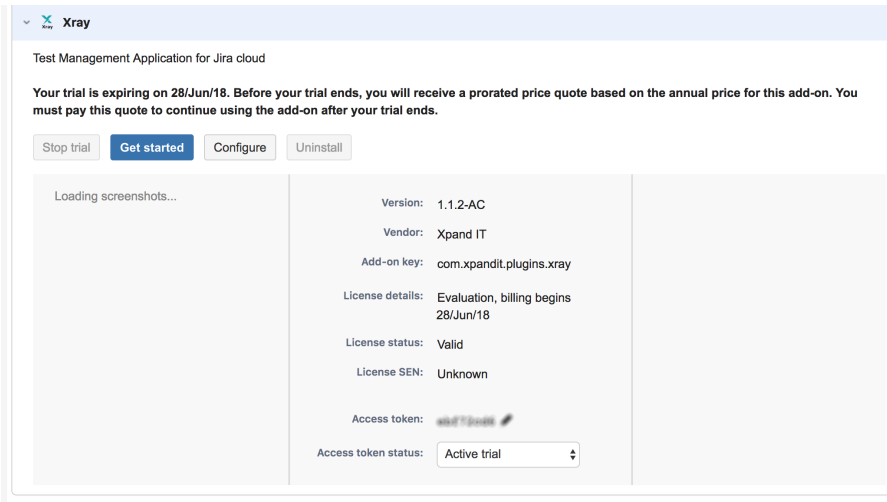

4. Select option **Upload Add-on** and enter the URL provided to you by the Xray team:

5. After the Xray app is installed, the token must be configured automatically when you expand the Xray add-on:

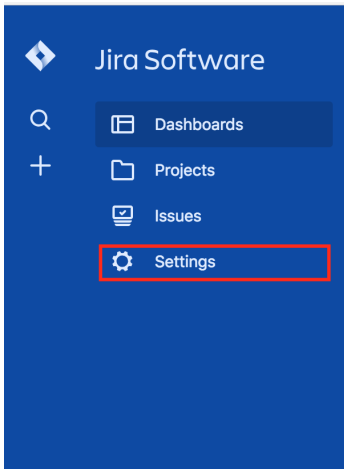

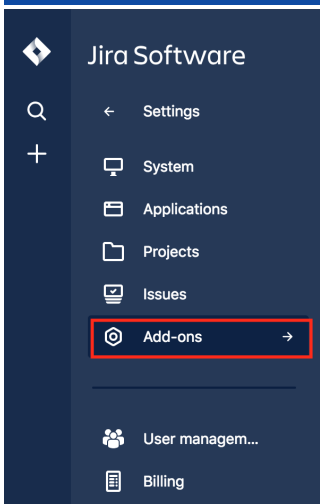

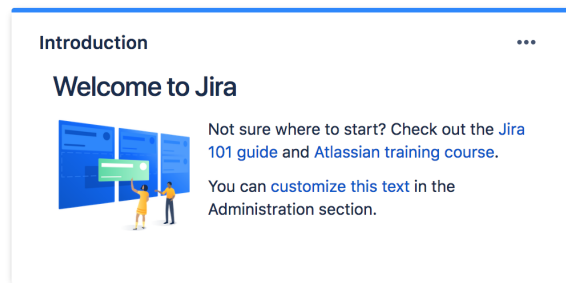

6. Enjoy! 😊

And if you're using the old Jira UI:

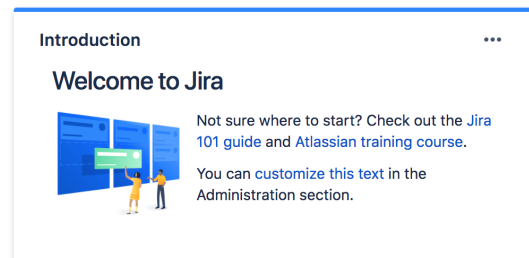

1. Make sure you have a project. If you're creating a new Jira Cloud instance, you may do it right-away during that process
2. Go into the Administration section of JIRA by choosing **Settings -> Add-ons -> Manage Add-ons:**

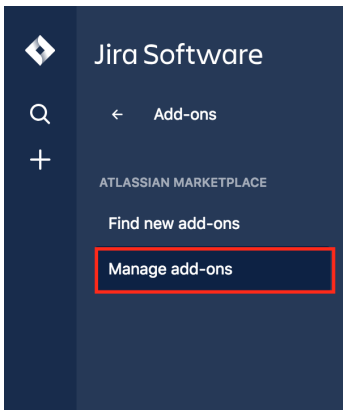

System dashboard
