Test Case Import Endpoint

There is a new method on the Xray REST API to import Test Cases from JSON files. It is possible to import any type of test, Manual, Gherkin and Unstructured. Xray will automatically create the corresponding Test issues in Jira with the test specification and test type. Other issue fields (both native and custom fields) are supported as well.

Learn more about this endpoint [here](#).

```
1  [
2  {
3    "testtype": "Cucumber",
4    "summary": "This tests the addition of 2 numbers.",
5    "project": { "key": "CALC" },
6    "gherkin_def": "Given I have entered <input_1> into the calculator\nAnd I have entered <input_2> into the ca
7    "reporter": {
