 - [Test Plan Metrics Report](#)
 - [Improved Issue Picker Dialog](#)
 - [Analysis Scope pre-selected per User and Project](#)
- [Features and Bug Fixes in this release](#)

Release highlights

Test Plan Metrics Report 😊

This report allows shows some relevant metrics about that enable you to evaluate a Test Plan and eventually compare it with others.

Possible usage scenarios:

- analyze both the progress of the Test Plan and its success rate (i.e., the % of Tests contributing to the requirement's OK status)
- analyze the success rate by Test Environment
- see the number of manual Tests vs. others in the Test Plan
- see the overall execution status (i.e., the latest status of the Tests of the Test Plan)
- see the number of linked defects opened/closed, in the context of the Test Plan

Improved Issue Picker Dialog

The Xray issue picker dialog has been improved. It now features three search types: Select, Filters and JQL directly accessible using tabs. The basic Filter search view has been reorganised.

The filters are now displayed on the left side and issue results table on the right. The dialog are as also been increased in size and the results table can now display more issues.

☒ Final statuses have precedence over non-final.

Status	Key	Summary	Test Status
↑ TO DO	CALC-28035	Test visitors can subscribe the book store Newsletter	TO DO
↑ TO DO	CALC-28036	Test visitors can unsubscribe from the book store Ne...	TO DO

The analysis scope chosen by user will be stored in the user preferences.
The saved analysis scope will be used in all issues of the project for that user.

This affects the Requirement and Test issues analysis web panels.
