

Xray 1.12.2 Release Notes

30 March 2016

The Xray for JIRA team announces the bug fix release of **Xray 1.12.2**. This release fixes the following bugs:

- A bug that was causing invalid/repeated indexes in Test Sets and Test Executions tables.
- Also, when upgrading from Xray <= 1.8.3 to the latest version, Test Runs were being deleted due to an error on an upgrade task. This bug was already fixed.
- Finally, a bug affecting the "TestRunStatus" custom field calculation was also fixed. This only occurred when non-final statuses were considered.
