Overall Test Results Gadget

Xray provides a gadget to analyze the overall test results distribution by their status. The test issues can span different projects.

Overall Test Results
By Xpand IT • Local

Add gadget

Pie chart of tests status for a project/filter, version, test plan, and test environment.

Purpose

This gadget provides a quick way of evaluating the status for some Tests taking into account the results obtained in the context of a version or a Test Plan.

Possible usage scenarios:

- See the amount of Tests, by current status, for a specific Version or Test Plan (i.e. have an overview of the Tests in the context of a version or of a Test Plan);
- Analyze the overall progress of a Test Plan;
- Analyze the overall status of some Tests, on some specific Test Environment;
- Analyze how a subset of some Test cases currently is (e.g. the ones defined by some relevant criteria in a user defined filter), in some version or in some Test Plan.

How to use

Source test issues for the chart can be provided by using a saved filter or by selecting a project:

- **Project or Saved filter:** a saved filter or a project containing the test issues.
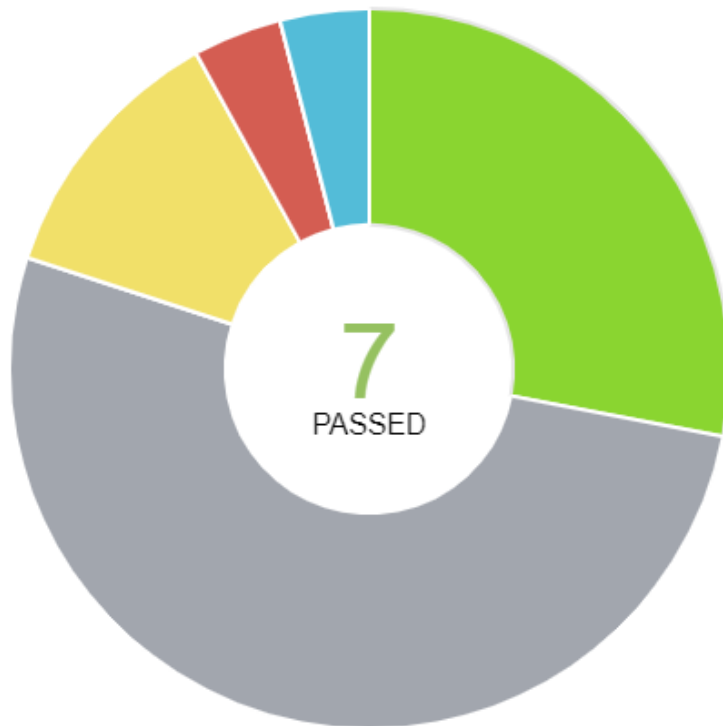

Notice that "**Project or Saved filter**" must be selected in order to use the gadget.

Additional configuration parameters for this gadget include:

- **Execution Scope:** Latest, Version or Test Plan;
- **Test Plan Key:** the key of the Test Plan, if the Execution Scope is "Test Plan";
- **Analysis Version:** the version, if the Execution Scope is "Version";
- **Test Environment:** the environment;
- **Final Status Precedence:** whether the final status have precedence over non-final one;
- **Auto-generate gadget name:** whether the name of the gadget should be generated based on its parameters or defined by the user.

It's also possible to hide a specific result type by clicking the legend item.

🟢 Final statuses have precedence over non-final.

🟢 Auto-generate gadget name

If this option is enabled, Xray will generate the gadget name based on its parameters. Otherwise, you can explicitly define a name for the gadget using the 'Rename' action.
