

[Xporter] Call the Custom Field from it's Id

You can export a Custom Field by its id

Step-by-step guide

Custom Field Name: Age

Custom Field id : 123456

```
${Age[123456]}
```

Tip: To find the custom field id go to Issues - Custom Fields - Choose the custom field that you want and press edit:

The screenshot shows the Jira admin interface. The browser address bar displays the URL: `cda-support-docker:1337/secure/admin/EditCustomFieldIddefault.jspa?id=10205`. The top navigation bar includes links for 'Support Team Dash...', 'Support Confluenc...', 'Xray', 'Xporter', 'Instances', 'Javascript', and 'Misc'. Below the navigation bar, there is a section for 'Administrative functions' with a link to 'Drop access if you no longer require it. For more information, refer to the documentation.' The main content area is titled 'Edit Custom Field Details' and contains the following information: 'Field Name' is 'Age', 'Description' is empty, and 'Search Template' is 'Multi Select Searcher'. A note at the bottom states: 'Note that changing a custom field searcher may require a re-index.'
