

[Xray Server] When I create a Test from the Requirement, the Test does not appear in Test Coverage

Problem

- 1 - Go to a Requirement issue type (Story, Feature, ...)
- 2 - Create New Test
- 3 - The Test does not appear in the Test Coverage

test requirement coverage

PMAX_XRAY / PMAXR-70

Possible Causes

The sequence of the list (Issue Linking) should be the root cause of the problem.

- You can use a different application that may be related to this situation because it creates a different issue type that overlaps the Xray issue type.

Solution

- 1 - Go to our issue Linking (Jira Administration -> Issues -> Issue Features - Issue linking) and change only the "Outward Description" to something like "Xtests" (you can choose it as you prefer)

Tests tests tested by 25 25 25 25

Add New Link Type Our Xray Issue linking

Edit Link Type

Name eg "Duplicate"

Outward Description eg "duplicates"

Inward Description eg "is duplicated by"

2 - Do a re-index of your Jira Instance

3 - Now Go to Jira Administration -> Manage apps and there you need to Disable and Enable the Xray app (This step is crucial)

⌵ Xray LICENSE EXPIRING

Xray is the #1 Manual & Automated Test Management App for QA. It's a full-featured tool that lives inside and seamlessly integrates with Jira. Its aim is to help companies improve the quality of their products through effective and efficient testing.

Renew your license to continue using it.

Why update to v. 6.4.1?
