

Default columns layout

- Each Xray page will have a table with configurable columns
- Reseting to default columns

The Xray administrator can set the default columns layout for each table of Xray views.

The screenshot shows the JIRA Administration page for Xray. The left sidebar contains a menu with options like 'ATLABIAN MARKETPLACE', 'Find new add-ons', 'Manage add-ons', 'XRAY FOR JIRA', 'Global Preferences', 'Custom Field Preferences', 'Issue Type Mapping', 'Requirement Coverage', 'Requirement Projects', 'Manage Test Statuses', 'Manage Test Step Statuses', 'Default Column Layouts' (highlighted), 'Integrity Checker', and 'License Management'. The main content area is titled 'Default Column Layouts' and 'The Global Configurations for Xray.' It lists various Xray views and their default column configurations:

- Test Execution**: Key, Summary, Test Type, #Req, #Def, Test Sets association with a Test, TestRun Assignee.
- TestRun Columns**: This specifies the default columns for the Test Run table on the Test Execution view issue screen.
- Test TestRun**: Key, Fix Version/s, Revision, TestRun Executed By, TestRun Started, TestRun Finished, TestRun Defects.
- Test Set Test**: Key, Summary.
- Test Set Test Columns**: This specifies the default columns for the Test Set table on the Test Set view issue screen.
- Test Plan Test**: Key, Summary, Requirements, #Test Executions.
- Test Plan Test Columns**: This specifies the default columns for the Test Plan table on the Test Plan view issue screen.
- Project Test**: Key, Summary, Test Type.
- Project Test Columns**: This specifies the default columns for the Test table on the Project Panel screen.
- Project Test Set**: Key, Summary.
- Project Test Set Columns**: This specifies the default columns for the Test Set table on the Project Panel screen.
- Project Test Execution**: Key, Fix Version/s, Revision.
- Project Test Execution Columns**: This specifies the default columns for the Test Execution table on the Project Panel screen.
- Project Test Plan**: Key, Summary, Begin Date, End Date, Fix Version/s.
- Project Test Plan Columns**: This specifies the default columns for the Test Plan table on the Project Panel screen.

A 'Save' button is located at the bottom of the configuration area.

Each Xray page will have a table with configurable columns

In each Xray table, you are free to choose what information you want in each page.

The screenshot shows the JIRA Xray page for issue CALC-110. The page has a header with 'Calculator / CALC-118' and 'TEST for CALC-110'. Below the header are buttons for 'Edit', 'Comment', 'Assign', 'More', 'Resolve Issue', 'Close Issue', and 'Admin'. The main content area is divided into sections: 'Details' (Type: Test Execution, Status: OPEN, Resolution: Unresolved, Fix Version/s: None), 'Description' (Click to add description), 'Tests' (A table with 1 test entry), 'Overall Execution Status' (TOTAL TESTS: 1), 'FILTERS' (Test Set: All, Assignee: All, Status: All, Search: Contains text, X Clear), and a table of test results. The table has columns: Key, Summary, Test Type, #Req, #Def, Test Sets, Assignee, Component/s, and Status. The first row shows 'CALC-110' with summary 'Cucumber Test for adding', test type 'Automated[Cucumber]', 0 #Req, 0 #Def, test sets 'CALC-113', assignee 'Manuel Mesquita', and status 'In Progress'. A 'Columns' dialog is open, showing a list of columns with checkboxes: Summary, Test Type, #Req, #Def, Test Sets association with a Test, TestRun Assignee, Component/s, Affects Version/s, and Asset. The 'Columns' button is highlighted in the dialog.

Reseting to default columns

If you want to reset the columns configuration to its default values, click **Restore Defaults**.
