

[Xray Server] How to remove an undesired test type?

When a test type is created and you do not need it anymore or is an undesired one, please see below how to remove it:

Step-by-step guide

To remove a test type, please go to Jira administration >> Issues >> Custom Fields >> search Test Type

Test Repository Path The Test Repository Path for this issue	Test Repository Path	Global (all projects)	10 screens	
Test Sets association with a Test Start typing to get a list of possible matches or press down to select from a list of existing Test Sets t...	Test Sets Picker	Global (all projects)	5 screens	
Test Type Choose the Test Type	Test Type Select List (sing...	Global (all projects)	5 screens	
TestRunStatus Latest Test Run final status	Test Run Status Custom F...	Global (all projects)	4 screens	
Tests associated with a Test Plan Associate tests with this test plan	Test Association with a T...	Global (all projects)	5 screens	

Then choose "Edit Options"

Default Configuration Scheme for Test Type

Default configuration scheme generated by JIRA

Applicable contexts for scheme: [Edit Configuration](#)

Issue type(s):

Default value: Manual [Edit Default value](#)

Options:

- Manual
- Cucumber
- Generic

[Edit Options](#)

And delete the type you do not want.

• [View Custom Field Configuration](#)

Position	Option	Order	Move To Position	Actions
1.	undesired	↓ ↗	<input type="text"/>	Edit Delete Disable
2.	Manual	↶ ↑ ↓ ↗	<input type="text"/>	Edit Delete Disable
3.	Cucumber	↶ ↑ ↓ ↗	<input type="text"/>	Edit Delete Disable
4.	Generic	↶ ↑	<input type="text"/>	Edit Delete Disable

[Move](#)

In Jira's administration, you may add other values for the "Test Type" custom field (see list below). For example, you may want to differentiate automated tests that may exist simultaneously in a project.

However, internally they will and must be handled as one of the two default Test Types for automated tests: "Cucumber" or "Generic".

Test Type custom field possible values	Internally will be handled as Test Type...
"Cucumber", "Automated[Cucumber]", "Gherkin", "Behave", "SpecFlow", "Behat"	Cucumber
"Generic", "Automated[Generic]"	Generic

Note: "Test Type" custom field values not shown above are not supported.
