

# September 19, 2019 - Minor Update - v1.1.36-1.009.000

September 19, 2019

The Xray team is proud to announce the release of **Xray Cloud 1.1.36-1.009.000**. This version includes major features such as the Test Plan Board, customizable filters for all web panels and reports, and the ability to sort Test Runs within a Test Execution.

  - [JUnit](#)

## Release highlights

## Test Plan Board 😊

The **Test Plan Board** enables users to organize Tests within a Test Plan issue in a hierarchy of folders and sub-folders while providing insights into the execution status of the Test Plan.

You can also define the order of the Tests and folders by ranking them within the tree presented within the Board.

By providing you with the ability to define groups and sub-groups (i.e., folders and sub-folders) for the Test Plan's Tests, you're able to track them independently and immediately see their current status, even if the scope of the Test Plan is broader. Also, you can more easily do operations for those subsets of Tests, such as creating Test Executions.

Learn more about the Test Plan Board [here](#).

The screenshot shows the Test Plan Board interface for a project named "Test Plan BOOK-30". The left sidebar displays a tree view of test cases categorized under "Board". The main area is a board view showing test cases in columns for "Board", "Board / Shopping Basket", "Board / Shopping Basket / Checkout", and "Board / Navigation". Each test case includes its title, description, status (e.g., PASSED, FAILED, BLOCKED), and environment information. A progress bar at the top indicates the overall status of the board.

| Category                | Description  | Status  | Environment                    |
|-------------------------|--|---------|--------------------------------|
| Board                   | BOOK-5 Test a visitor can filter the search result                           | PASSED  | All Environments, final status |
| Board                   | BOOK-4 Shopping Basket User selects an item and clicks on "express checkout" | PASSED  | All Environments, final status |
| Board                   | BOOK-8 Test a visitor can view all the books in his shopping basket          | PASSED  | All Environments, final status |
| Board                   | BOOK-10 Test visitors can add books to their shopping basket                 | PASSED  | All Environments, final status |
| Board                   | BOOK-9 Test visitors can remove books from their shopping basket             | PASSED  | All Environments, final status |
| Board / Shopping Basket | BOOK-15 Test a visitor can Checkout items in his basket                      | FAILED  | All Environments, final status |
| Board / Shopping Basket | BOOK-14 Test Checkout with incorrect delivery details                        | PASSED  | All Environments, final status |
| Board / Navigation      | BOOK-11 Test visitors can navigate to the book details page                  | PASSED  | All Environments, final status |
| Board / Navigation      | BOOK-3 Favorites List User selects a book and clicks on the star             | BLOCKED | All Environments, final status |

### Filter including additional fields and JQL

Users can now include any issue field (native or custom fields) on the filter components in Xray. As of this version, JQL searches are also possible.

This new filter is included in:

- Tests web panel of a Test Execution
- Tests web panel of a Test Plan
- Test Runs web panel of a Test
- Test Repository
- Test Plan Board
- Reports
  - Test Coverage
  - Traceability
  - Test Plan Metrics
  - Tests List
  - Test Sets List
  - Test Plans List
  - Test Executions List

Learn more about this feature [here](#).

## Sorting the Test Runs table within a Test Execution

It is now possible to sort the Test Runs table within a Test Execution.

As a result of being able to sort the table, the drag-n-drop Rerank operation might be disabled.

Users can only rerank Test Runs using drag-n-drop if the table is sorted by the original "rank" in ascending direction. Otherwise, the drag-n-drop option to rerank will be disabled.

Learn more about this feature [here](#).

The screenshot shows the 'Tests' section of a test execution interface. At the top, there's an 'Overall Execution Status' bar with the following counts: 16 PASSED (green), 1 FAILED (red), 1 BLOCKED (blue), 1 EXECUTING (yellow), and 2 TO DO (grey). Below the status bar is a summary table with columns: Rank, Key, Summary, Test Type, TestRun Assignee, Status, and Actions. The 'Status' column is highlighted with a red border. The table lists 10 test runs, each with a checkbox, a rank number, a key (e.g., BOOK-3, BOOK-2, etc.), a summary description, a test type (Manual or Cucumber), an assignee (Unassigned or Cucumber), and a status color-coded box (BLOCKED, EXECUTING, FAILED, PASSED). The last two columns show actions (a play button and three dots).

| Rank                     | Key | Summary   | Test Type | TestRun Assignee | Status  | Actions |
|--------------------------|-----|---|-----------|------------------|---|---------|
| <input type="checkbox"/> | 16  | BOOK-3 Favorites List User selects a book and clicks on the star    | Manual    | Unassigned       | <span style="color: blue;">BLOCKED</span>     |         |
| <input type="checkbox"/> | 19  | BOOK-2 Test visitors can unsubscribe from the book store Newsletter | Manual    | Unassigned       | <span style="color: yellow;">EXECUTING</span> |         |
| <input type="checkbox"/> | 13  | BOOK-15 Test a visitor can Checkout items in his basket             |           | Unassigned       | <span style="color: red;">FAILED</span>       |         |
| <input type="checkbox"/> | 1   | BOOK-20 Test visitors can Login to Book Store Website               | Manual    | Unassigned       | <span style="color: green;">PASSED</span>     |         |
| <input type="checkbox"/> | 2   | BOOK-19 Test logged in visitors can Logout from their account       | Manual    | Unassigned       | <span style="color: green;">PASSED</span>     |         |
| <input type="checkbox"/> | 3   | BOOK-18 Test a logged in visitor can edit the account details       | Manual    | Unassigned       | <span style="color: green;">PASSED</span>     |         |
| <input type="checkbox"/> | 4   | BOOK-17 Test a logged in visitor can edit the default address       | Manual    | Unassigned       | <span style="color: green;">PASSED</span>     |         |
| <input type="checkbox"/> | 5   | BOOK-16 Test a visitor can change his locale                        | Cucumber  | Unassigned       | <span style="color: green;">PASSED</span>     |         |
| <input type="checkbox"/> | 6   | BOOK-7 Test a visitor can do a valid search with a single keyword   | Manual    | Unassigned       | <span style="color: green;">PASSED</span>     |         |

And more...

## Supported Languages

- Added support for the **French** language. Now Xray supports English, Spanish, German and French.

## GraphQL

- XRAYCLOUD-1144:** Xray now supports filtering Test Runs by Assignee, considering the Test Execution issue assignee
- XRAYCLOUD-1145:** A new query for fetching Xray project settings is now provided

## JUnit

- XRAYCLOUD-1147:** JUnit reports can now be imported including a custom property for specifying the Requirement issue associated with each Test case
