[Xray Cloud] How to configure credentials in Jenkins

To be able to integrate Jenkins with Xray Cloud it is necessary to configure the Jenkins Credentials Plugin to set the API Client ID and Client Secret.

Step-by-step guide

- 1. Create the API Keys in Jira Cloud (please follow the steps found in our documentation here),
- 2. In Jenkins, go to the Credentials option and add new Credentials,
- 3. In the Credentials, screen use the "Username with password" Kind,
- 4. And set the Client ID in the Username and the Client Secret in the Password:

😥 Jenkins			
Jenkins	edentials	(unrestricted)
 ▲ Back to credential domains ▲ Add Credentials 	Kind	Username w	rith password
		Scope	Global (Jenkins, nodes, items, all child items, etc)
		Username	set Client ID here
		Password	set Client Secret here
		ID	
		Description
