

March 9, 2020 - Minor Update - v1.1.41-1.010.000

March 9, 2020

The Xray team is proud to announce the release of **Xray Cloud 1.1.41-1.010.000**. This version features a revamp of the manual steps UI and the ability to configure new Test Step Custom Fields per project. Also, there is a new field for "Actual Results" when executing Test Steps.

Release highlights

Revamped Test Steps UI 😊

The Test Steps UI has been redesigned aiming to provide a better user experience when creating, editing and viewing manual Test Steps.

Besides all the visual changes, you can now:

- Use the Jira WYSIWYG markdown editor and toolbar to define steps.
- Choose between two view modes: Grid or List.
- Expand and collapse steps.
- Create a new step in any position.
- Edit all steps in a dialog taking advantage of the additional screen real-estate for managing Test Steps.

Edit Steps

The screenshot displays the 'Edit Steps' interface in Xray Cloud. At the top, there are tabs for 'Import', 'Export', and '+ Create Step'. Below this is a toolbar with icons for grid/list view, undo, redo, and a plus sign for adding new steps. The main area shows a list of test steps, each with an 'Action' field, a 'Data' field, and an 'Expected Result' field. A context menu is open over the first step, showing options: Link, Table, Quote, Code snippet, and Divider. The first step is titled 'Action' and contains the text 'Open the Change Password screen by selecting option "My Profile > Password"'. It has an attachment 'screens(...).png'. The 'Data' field for this step contains: 'Current Password: password', 'New Password: p4ssw0rd', and 'Confirm New Password: p4ssw0rd'. The 'Expected Result' field contains: 'Error: "Current password is incorrect"'. The second step is titled 'Action' and contains the text 'Fill the password fields with data'. The 'Data' field contains: 'Current Password: P4ssw0rd', 'New Password: password', and 'Confirm New Password: password'. The 'Expected Result' field contains: 'Error: "New password is too simple"'. The third step is titled 'Action' and contains the text 'Close error message and fill again the password fields with data'. The 'Data' field contains: 'Current Password: P4ssw0rd'. The 'Expected Result' field contains: 'Information message:'. The interface has a 'Done' button at the bottom right of the first step and a 'Save' button at the bottom right of the entire list.

Edit Steps

New "Actual Results" Field on Test Steps

You can now set the "Actual Results" when executing Test Steps.

This field features a WYSIWYG markdown editor. You can attach an image or screenshot and reference attachments/images from the evidence available on the Test Run using markdown notation.

Learn more about this feature [here](#).

The screenshot displays the XRAY Cloud Test Run interface. At the top, a green bar indicates the source is "Backoffice". Below this, a "Show More" button is visible. The main interface is divided into sections. The "Actual Result" section is highlighted, showing a "Comment" field, "Defects" (+), "Evidence" (+), and a "Step State" of "PASSED". Below this, the "Execution Domain" section shows "POSTMAN" and "Action" (Execute the following request.). The "Data" section shows the URL "https://staging-server.local:8682/store/order/<ORDER_ID>". The "Expected Result" section shows a JSON response structure. The "Actual Result" section shows a "Body" tab with a "Pretty" view of a JSON response:

```
1 {
2   "orderId": "<ORDER_ID>",
3   "status": "PROCESSING",
4   "source": "Backoffice",
5   "items": [
6     ...
7   ]
8 }
```

 Below this, the "Actual Result" section shows a "Body" tab with a "Pretty" view of a JSON response:

```
1 {
2   "error": "Could not find authentication data on request"
3 }
```

 The "Actual Result" section also shows a "Status" of "401 Unauthorized", "Time" of "121ms", and "Size" of "408 B". The "Actual Result" section is highlighted, showing a "Comment" field, "Defects" (+), "Evidence" (+), and a "Step State" of "FAILED".
