Test Plans Overview

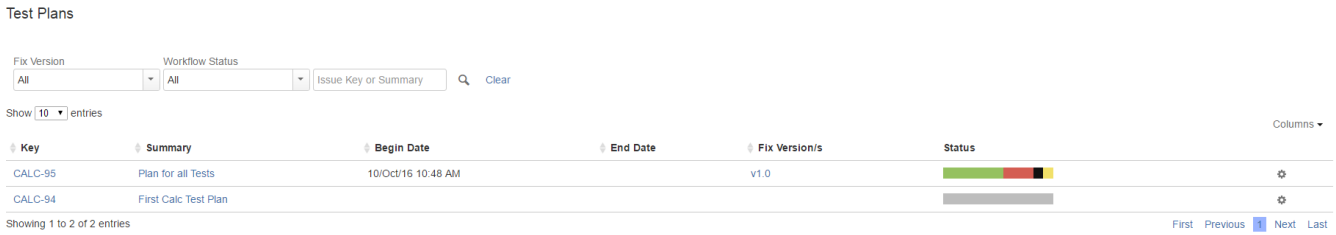

The Test Plan project tab shows a list of Test Plan issues and their corresponding execution status. The Test Plan status is shown as a progress bar with the latest Test Run status from each Test issue that is associated with that Test Plan. This list allows a transversal analysis of the Tests Plans for a project.

The Test Plans page is headlined by the Test Plans Filter that allows the user to search by:

- the **Fix Version** tested by the a Test Plan the selected Project is associated with
- the **Status** of the Test Plan the selected Project is associated with
- the **Issue Key** or **Summary** of a Test Plan

The search results are displayed on the table immediately under the Test Plan Filter, which contains:

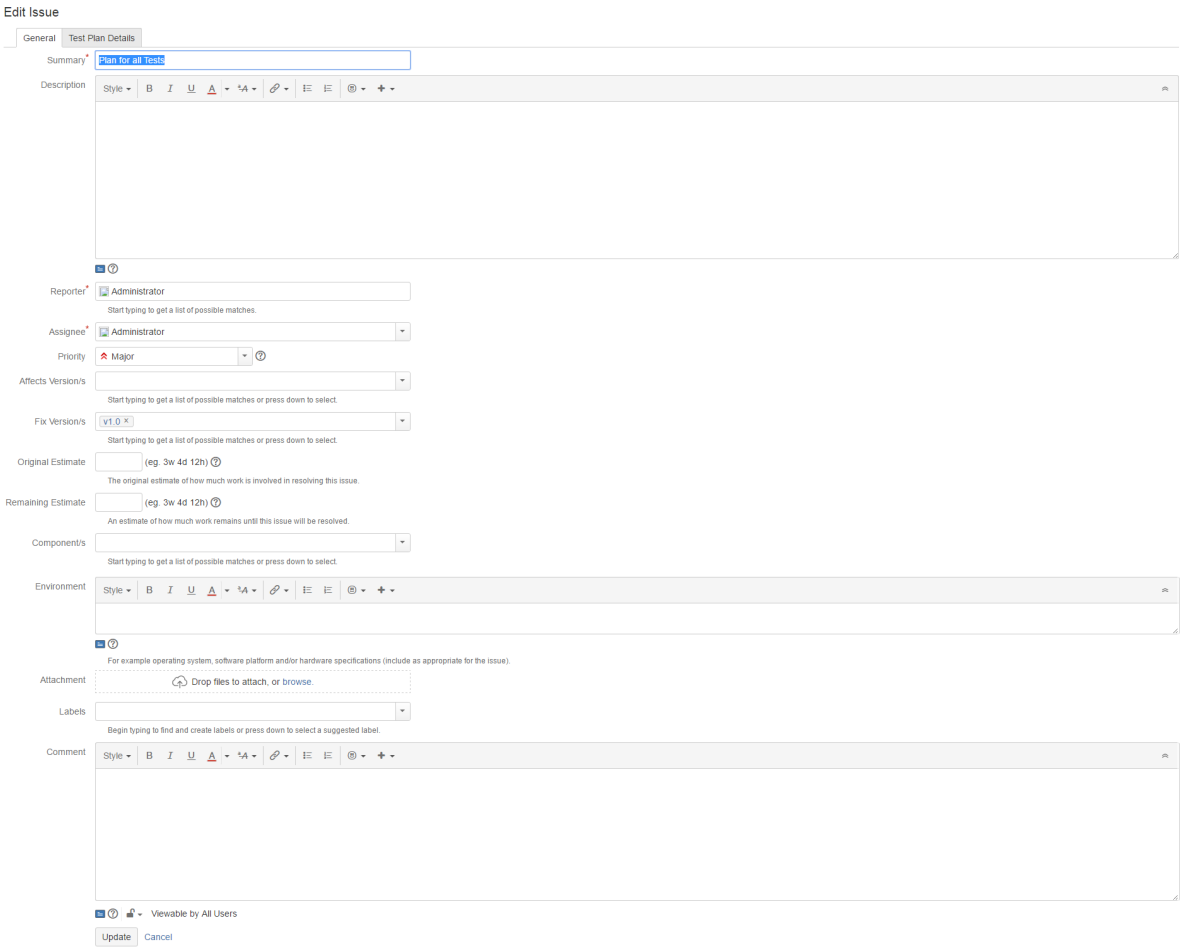

- the Test Plan issue **Key** of the listed Test Plan the selected Project is associated with
- the **Summary** of the listed Test Plan the selected Project is associated with
- the **Start** and **End** dates of the listed Test Plan the selected Project is associated with
- the **Fix Version** tested by the a Test Plan the selected Project is associated with
- the Execution **Status** of the listed Test Plan the selected Project is associated with

From each Test Plan row, it is possible to perform some quick actions by clicking the **Gear** button. The following actions are available:

- **Edit**, which, when clicked, jumps to the Test Plan issue **Edit** page.
