

Test Plans Report

Shows a list of Test Plans with consolidated information for each one, including the test statuses count, overall progress and Test Environment-related metrics.

Please note

To use this report, your project must have the Test Plan issue type in the issue type scheme.

- [Purpose](#)
- [How to use](#)

- [Sharing the Report](#)

Purpose

This report allows shows some relevant metrics that enable you to evaluate a Test Plan and eventually compare it with others.

Possible usage scenarios:

- analyze both the progress of the Test Plan and its success rate (i.e., the % of Tests contributing to the requirement's OK status)
- analyze the success rate by Test Environment
- see the number of manual Tests vs. others in the Test Plan
- see the overall execution status (i.e., the latest status of the Tests of the Test Plan)
- see the number of linked defects opened/closed, in the context of the Test Plan

How to use

This report is accessible either from the **Xray Reports** icon on the project left sidebar or from the standard **Reports** icon, which includes other kinds of reports besides Xray.

At the top of the report you'll find two areas related with the report and with the data shown in the report.

Source data

Source Test Plan issues can be directly provided (within section A) using a saved filter or by specifying some Test Plan fields:

- **Saved filter:** a saved filter containing Test Plan issues
- **Project:** Select multiple projects to analyze (**Only available in Xray Enterprise**)
- **Fix Version:** the version assigned to the Test Plan
- **Assignee:** the Test Plan's assignee
- **Status:** the workflow status
- **Resolution:** the workflow resolution

Please note

Only Test Plans from the select projects are shown.

Metrics

Metric	Notes
total test executions	Number of Test Executions related with this Test Plan
total test runs	Total number of Test Runs from all related Test Executions
total tests	Number of Tests being tracked by the Test Plan
number of tests by status	Number of Test Plan's Tests, per latest status
number of tests by test type	Number of Test Plan's Tests, per Test Type If you create a custom Test Type it would be represented as "Other".
progress	Overall progress; % of Tests with a final status
success rate	% of "successful" Tests (i.e., whose latest status contributes to the OK requirement status; the PASS Test Run status is an example of such a status)
success rate by Test Environment	% of "successful" Tests (i.e., whose latest status contributes to the OK requirement status), per Test Environment
linked defects (open /closed)	Defects directly associated with the related Test Runs (i.e., that were created within the context of Test Executions of a given Test Plan). Will count unique Defects (i.e., if the same Defect issue is added multiple times in the same Test Run or added multiple times within Test Runs within the same Test Plan, it will count as one) Defects with Resolution will be counted in the Closed column; all others will be counted in the Open column.

The report may be a bit wide for some screen resolutions so you will need to scroll horizontally to see the rest of the information.

Some values provide a link, so you can be redirected to the respective entities.

 "Other" in "Tests by Test Type" is used to relate to all [custom Test Types](#) that you might have created.

Exporting the Report

The report can be exported to a CSV file, which will include all report rows (and not just the visible ones).

Click on **Export** and select **To csv**.
