Examples of custom gadgets

Overview

Most of the following reports are made using the "Filter Results" Jira gadget, which returns issues in a table layout.

The **Pie Chart** and the **Two-Dimensional Filter Statistics** are also two interesting gadgets that may be used for building reports.

Regardless of the gadget you use, the important aspect is to filter the relevant issues. This may be obtained using JQL (see Enhanced querying with JQL).

There is a special note regarding custom fields (e.g., "TestRunStatus", "Test Set Status") that depend on the Xray's configuration and not the JQL query.

> You can also generate reports using the Xporter app detailed in Reports with Xporter.

Sample reports

List of Requirements, with coverage info

Lists requirements with current coverage status based on the most recently executed Test.

Gadget: Filter Results

Sample JQL: List requirements of project "CALC" for version "v3.0".

```
project = CALC AND issuetype = Story and fixVersion = "v3.0"
```

Sample JQL: List requirements of project "CALC" of a previous version "v3.0", which are NOK in the newer version "V4.0"

```
project = CALC AND issuetype = Story and fixVersion = "v3.0" and issue in requirements('NOK', 'CALC', 'V4.0')
```

T	Key	Summary	P	Requirement Status ↑
◎	CALC-619	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-589	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-490	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-416	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-400	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-413	S1	≫	v3.0 - OK
◎	CALC-653	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - OK
◎	CALC-629	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - NOK
◎	CALC-605	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - NOK
◎	CALC-640	As a user, I can calculate the sum of 2 numbers	≫	v3.0 - NOK

List of Tests

Lists tests for a given project version.

Gadget: Filter Results

Sample JQL: List Tests for project "CALC", version "v1.0".

```
issuetype = 'Test' and issue in testsWithReqVersion('CALC', 'v1.0')
```

Sample JQL: List Tests for Test Sets, of project "CALC", that have fixVersion "v1.0".

```
issuetype = 'Test' and issue in testsWithTestSetVersion('CALC', 'v1.0')
```

If you want to include the Test status, then you just need to add the **TestRunStatus** column in the gadget's configuration.

List of Test Sets, with status

Lists test sets for a given project version.

Gadget: Filter Results

Sample JQL: All Test Sets of project "CALC"

```
project = 'CALC' and issuetype = 'Test Set'
```

Sample JQL: All Test Sets of project "CALC" explicitly marked with fixVersion "1.0"

```
project = 'CALC' and issuetype = 'Test Set' and fixVersion = 'v1.0'
```

If you want to include the Test status, then you just need to add the **Test Set Status** column in the gadget's configuration.

Filter Results: CALC Test Sets

List of Test Executions, with status

Lists Test Executions for a given project version.

Gadget: Filter Results

Sample JQL: All Test Executions of project "CALC" that ran in version "v3.0", build (i.e., Revision) 100.

```
project = 'CALC' and issuetype = 'Test Execution' and fixVersion = 'v3.0' and Revision ~ 100
```

Sample JQL: All Test Executions of project "CALC", latest ones executed first.

```
project = 'CALC' and issuetype = 'Test Execution' ORDER BY created DESC
```

Additional columns can be appended to this gadget:

- **Begin date:** the planned begin date for the start of the execution
- **End date:** the due date for the execution completion
- **Test Execution Status**: shows the last execution status for all the Test issues in the Test Execution

Filter Results: Calculator Test Executions

Tests to be executed by a user

Lists tests to be executed by a specific user.

Gadget used: Filter Results

Sample JQL: List Tests that are yet to be executed (i.e., in TODO status) by user "admin"

```
issuetype = 'Test' and issue in testExecutionTests('Calculator Test Executions', 'TODO', 'admin')
```

If you want to include the Test status, then you just need to add the **TestRunStatus** column in the gadget's configuration.
