Xray 3.3.6 Release Notes

2 April 2019

The Xray team announces the bug fix release of Xray 3.3.6.

(i)

If installing manually from Atlassian Marketplace, please make sure you install the correct asset for your Jira version (i.e. 7.x, 8.x, datacenter) from the releases page.

Upgrading from an Xray version lower than v3.2.0?

Starting from Xray v3.2.0, the amount of information indexed by Jira's Lucene framework has increased. In order to not increase the index time, Xray is now pre-calculating this data so when re-indexing there is less calculation to be done.

Whenever installing Xray from a version lower than 3.2.0, this implies that an upgrade task must run to pre-calculate historical data. This action is a one time action and it will run in the background so that Xray is still available during the upgrade. However, this process may be long and CPU intensive depending on the Jira instance size and thus we recommend to perform the upgrade at off-peak times.

In order to manage this calculation, Xray provides a panel inside "Custom Field" preferences page from where you can stop, start and follow the progress of it.

Administration a se	earch JIRA admin							
Applications Projects Issues	Add-ons User manag	ement Latest upgrade report System						
ATLASSIAN MARKETPLACE Find new add-ons Manage add-ons	Custom Fields The default configurati Test Run Status	Ons for Xray custom fields.						
XRAY Miscellaneous Custom Fields Issue Type Mapping	Custom Field Version	When this option is enabled, the status of the Test is calculated based in the latest TestRun independently on the version it was executed. Earliest Unreleased Version When this option is enabled, the status of the Test is calculated based in the latest TestRun executed on the earliest unreleased Version. First Assigned Version When this option is enabled, the status of the Test is calculated based in the latest TestRun executed on the first Fix Version explicitly assigned to the Test.						
Requirement Coverage Requirement Projects Manage Test Statuses Manage Test Step Statuses Default Column Layouts Integrity Checker License Management	Test Set Status No Version Custom Field When this option is enabled, the status of each Test in the Test Set is calculated based in the latest TestRun independently on the version it was executed. Version Earliest Unreleased Version When this option is enabled, the status of each Test in the Test Set is calculated based on the earliest unreleased Fix Version. Earliest Unreleased Assigned Version When this option is enabled, the status of each Test in the Test Set is calculated based on the earliest unreleased Fix Version explicitly assigned to the Test Set. First Assigned Version When this option is enabled, the status of each Test in the Test Set is calculated based on the earliest unreleased Fix Version explicitly assigned to the Test Set. First Assigned Version When this option is enabled, the status of each Test in the Test Set is calculated based on the first Fix Version explicitly assigned to the Test Set.							
	Requirement Status Custom Field Versions	 No Version When this option is enabled, the status of each Test associated with the Requirement is calculated based in the latest TestRun independently on the version it was executed. Earliest Unreleased Version When this option is enabled, only the earliest unreleased Fix Version is displayed in the Custom Field. Unreleased Versions When this option is enabled, all unreleased Fix Versions are displayed in the Custom Field. Assigned Versions When this option is enabled, all explicitly assigned Fix Versions are displayed in the Custom Field.
