Reports with Xporter

Xporter is an app developed by Xpand IT, that provides a simple way to export issues to a variety of formats (PDF, DOCX, XLSX, etc.) to be included in a company report. Being highly customizable, it works with user-created templates in the form docx files with special placeholders.

Through its integration with Xray, Xporter provides a simple way to export Single Tests, Single Test Sets and a Bulk of Tests/Test Sets.

More information about Xporter, including the license purchase process, is available in the app's homepage. Technical documentation is available here.
