

# Export Tests using JIRA built-in features

Exporting tests can be done in different ways: either by using some of Jira's built-in features (which vary from Jira version to Jira version) or by using [Xporter app](#). What you can do with Jira out-of-the-box may be rather limited but it may be enough to address your needs. If you want to have full control over the layout and the format of the generated document, then Xporter is the way to go.

- [Export to a printable layout / PDF](#)
- [Export to CSV](#)
- [Export Test to XML](#)
- [Export Test Runs to CSV](#)

Jira lets you export your data in CSV or Excel (file is saved as *XLS*, but you can open it with your spreadsheet tool and export it to CSV). Xray custom fields are compatible with this function. Even Manual Test Steps field can be exported in a JSON format so that it can be imported back to Jira directly.

## Please note

Since Jira 7.2, Jira **only** provided the ability to export issues to CSV in a limited way; recent versions do not support natively the ability of exporting to Excel.

If you need to export issues, including your Tests, to Excel or fully customizable templates, then we recommend you use the [Xporter app](#).

## Export to a printable layout / PDF

Recent versions of Jira give the ability to export issues, including Xray Tests, to a printable, non-customizable, layout.

You just need to go to **Issues > Search**, select the Test issues, and the column "**Manual Test Steps**", if you're aiming to export manual test cases.

Jira  
Project: Book Store  
Type: Test  
Test Type: Manual  
Sorted by: Key ascending  
1-8 of 8 as at: 18/Jun/20 1:44 PM

Key	Status	Created	Updated	Development	Manual Test Steps
STORE-27	TO DO	24/Apr/20	24/Apr/20		<div><div>1</div><div>Action</div><div>Open the Change Password screen by selecting the option "My Profile &gt; Password"</div><div>Data</div><div>-</div><div>Expected Result</div><div>-</div></div> <div><div>2</div><div>Action</div><div>Fill the password fields with data</div><div>Data</div><div>Current Password: passw0rd</div><div>New Password: p4ssw0rd</div><div>Confirm New Password: p4ssw0rd</div><div>Expected Result</div><div>Error:</div><div>"Current password is incorrect"</div></div> <div><div>3</div><div>Action</div><div>Close error message and fill again the password fields with data</div><div>Data</div><div>Current Password: P4ssw0rd</div><div>New Password: password</div><div>Confirm New Password: password</div><div>Expected Result</div><div>Error:</div><div>"New password is too simple"</div></div> <div><div>4</div><div>Action</div><div>Close error message and fill again the password fields with data</div><div>Data</div><div>Current Password: P4ssw0rd</div><div>New Password: P4ssw0rd</div><div>Confirm New Password: P4ssw0rd</div><div>Expected Result</div><div>Information message:</div><div>"Password successfully changed"</div></div>
STORE-28	TO DO	24/Apr/20	24/Apr/20		<div><div>1</div><div>Action</div><div>Open the App, choose option <b>My Profile &gt; Logout</b>.</div><div>Data</div><div>-</div><div>Expected Result</div><div>-</div></div> <div><div>2</div><div>Action</div><div>On the login screen, select option <b>I lost my password</b>.</div><div>Data</div><div>-</div><div>Expected Result</div><div>-</div></div> <div><div>3</div><div>Action</div><div>On the email field, provide the address data and press <b>Reset my Password</b>.</div><div>Data</div><div>Email: user@test.com</div><div>Expected Result</div><div>Information message:</div></div>

Then the browser can be used to print this to paper or, eventually, to PDF (if the browser supports this natively or if there is a custom printer driver for this purpose).

## Export to CSV

If you want to export to CSV to have an Excel-like sheet, with the steps in a readable way, exporting to CSV using Jira will not provide you that ability (Xporter would be the proper solution).

If you want to export the Test definition (Test's description and manual test steps) in order to import them once again, you may use the following approach.

Go to **Issues > Search**, select the Test issues, and the column **"Manual Test Steps"**; that column has the steps in HTML but when you export them to CSV, they will be converted into a JSON format within the CSV column.

**Step 1:** Open the Test issue view page.

**Step 2:** Select **More > Export Test to XML**. The resulting XML file will be downloaded to the browser.

The screenshot shows the Jira issue view page for 'Calculator / CALC-1' with the title 'Add two numbers'. The 'More' menu is open, and 'Export Test to XML' is highlighted. The issue details include a description, test details, and a table of test runs.

Test Key	Test Execution Key	Executed By	Assignee	Start	Finish	Defects issue keys (list separated by ",")	Attachment JIRA links (list separated by ",")	Comment	Status
1	1	Administrator	Administrator	26/Nov/13 9:40 AM	30/Apr/14 11:59 AM				

## Export Test Runs to CSV

Xray Test Runs can be exported to CSV. Xray export action will export to CSV the most relevant fields for Test Runs such as:

- Test Key
- Test Execution Key
- Executed By
- Assignee
- Start
- Finish
- Defects issue keys (list separated by ",")
- Attachment JIRA links (list separated by ",")
- Comment
- Status

To export a Test Run to CSV,

**Step 1:** Open the Test issue view page.

**Step 2:** Select **More > Export Test Runs to CSV**. The resulting CSV file will be downloaded to the browser.
