

Conditional Blocks

Conditional blocks allow you to show or hide sections of the document according to conditional expressions.

It has the following notation:

Expand to see the sample code

```
#{if (%{<Javascript>}}  
    CONTENT  
#{end}
```

<Javascript> is a JavaScript expression that should evaluate to true or false.

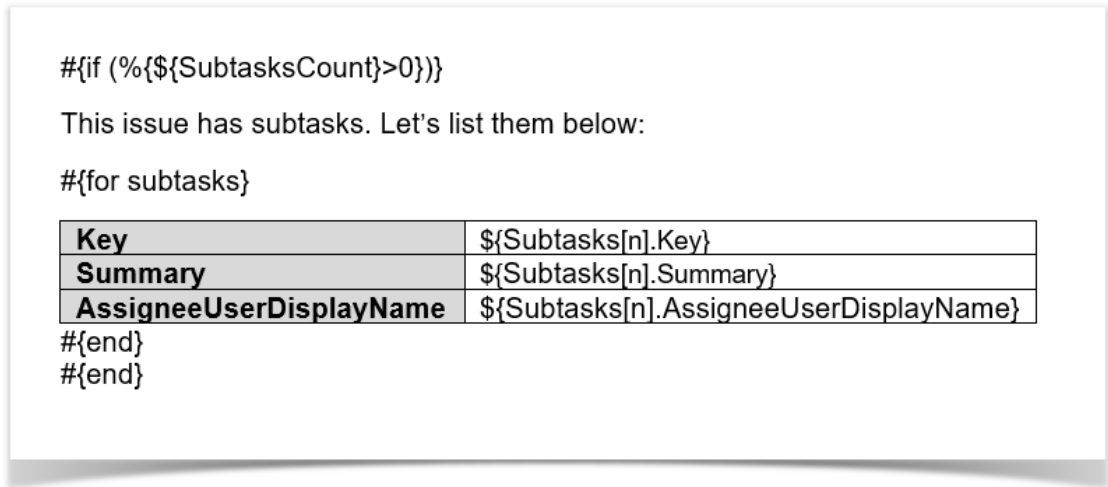

Below is a working example:

Expand to see the sample code

```
This is the header of the document.  
  
#{if (%{'${IssueTypeName}'.equals('Bug')}}}  
This section will only be visible if the issue type of the issue is Bug  
This issue is a bug created by ${AssigneeUserName} with priority ${Priority}.  
#{end}  
  
#{if (%{'${Priority}'.equals('Major')}}}  
This section will only be visible if the priority of the issue is major.  
This issue has top priority, needs to be resolved until ${DueDate}.  
#{end}  
  
#{if (%{'${escape:Description}'.equals('')}}}  
This issue has no description  
#{end}  
  
#{if (%{'${escape:Description}'.length > 0}}}  
Issue description: ${Description}  
#{end}  
  
This is the footer of the document.
```

For more examples, check the Sample Conditions.docx template in the [Template Store](#).

The image below demonstrates a Word template with a conditional block:

The image below demonstrates an Excel template with a conditional block:

	A	B	C
1	Key	Summary	Assignee
2	#if (%\${SubtasksCount}>0)}		
3	#for subtasks		
4	\${Subtasks[n].Key}	\${Subtasks[n].Summary}	\${Subtasks[n].AssigneeUserDisplayName}
5	#end		
6	#end		
7		Totals:	\${SubtasksCount}
