Tests...

Test Sets...

From R3.4.0 the Xray issue picker dialog had major improvements, it now features:

- Three ways of picking the issues, using the Select, Search or JQL tabs.
- The Search tab view (previously very similar to Jira basic issue search) has been reorganised, the filters are now displayed on the left side and issue results table on the right.
- The dialog area as also been increased in size and the results table can now display more issues.

Issue Picker Dialog

- Select Tab
- Search Tab
- JQL Tab
- Add Selected/ Add All

Please Note

The most advanced format of the Issue Picker Dialogue is the one presented when you add Tests or Test Sets to a Test Execution.

In this specific case before adding the selected tests you can define the execution assignee by using the upper right corner **Assignee dropdown**, which provides you a suggestions list with the *user type* fields found in the tests.

If you choose one of these fields for example the "Test Reporter" field, the assignee of the resultant Test Run will be the user set in the Test Reporter field of the respective test.

Add Tests to Test Execution CALC-1976

Select **Search** JQL

Filter(s)

Project
Calculator (CALC)

Test Type

Choose the Test Type

Contains text

Choose the search criteria using the filters on the left panel and press search.

Clear Search

☒ Hide Tests in non-executable Statuses Cancel

Notice the setting for ignoring Tests in non-executable statuses at the bottom-left side.

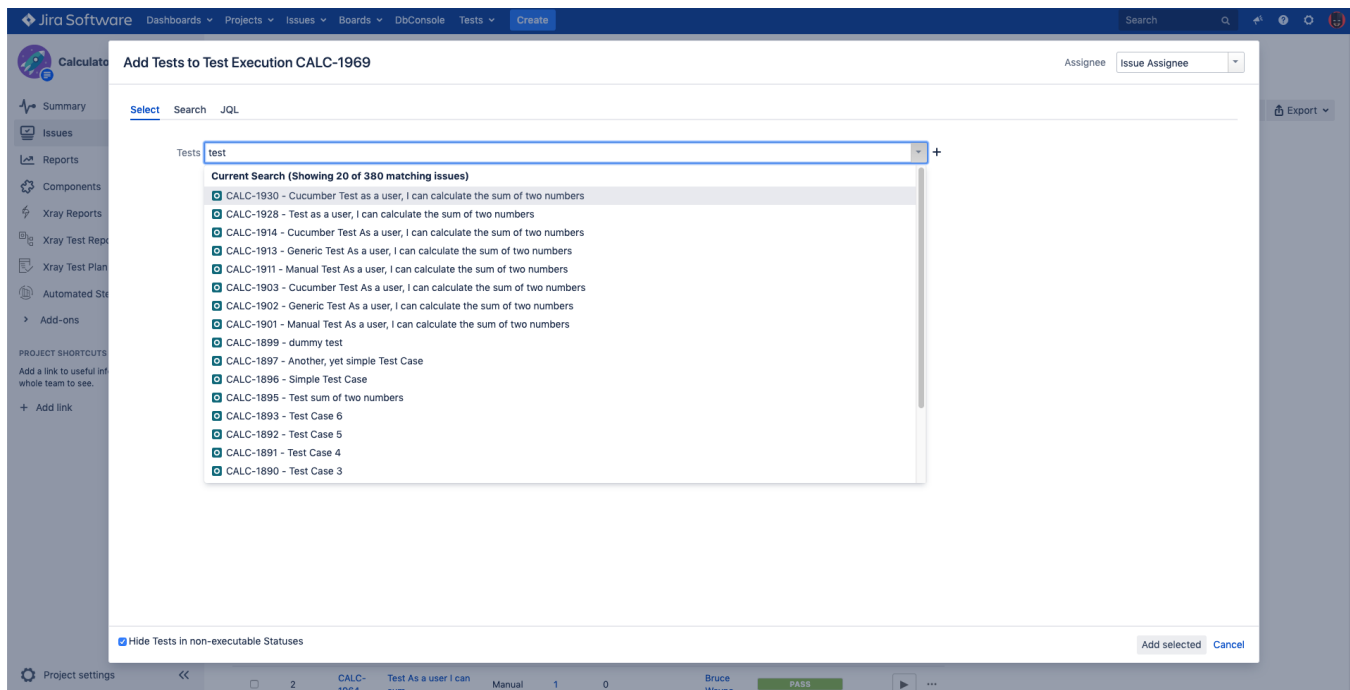

By default it will be selected, therefore restricting the shown Tests available for adding accordingly to the configuration "Miscellaneous > Workflow Status > Disallow executions of Tests with workflow statuses".

Select Tab

This tab provides you an issue selector with a suggested list of recent issues or you can search by the text contained in the Summary.

How to add issues using the **Select** tab:

- Input the desired Test **Issue Key** on the **Tests** field.
- Click on the **Down Arrow** on the Tests field and select the Test from its **History Search** list.
- Click on the **+** button which will prompt an **Issue Selector** Pop-Up.
- Click on the **Search** tab to use the **Find Jira issues** browser.

Search Tab

How to add issues using the **Search** tab:

Search Test Issues - In order to search for Tests to be associated, you can, under the **Search** tab:

- Browse for the desired Test **Project**, **Type** or terms it **Contains**.
- Click on the **More** button to add more browse fields such as **Label**, **Test Set**, **Test Set Fix Version**, **Requirement**, **Requirement Fix Version**, **Saved Filter** and **Workflow Status**.
- Click on the **Magnifier** button after filling out the browse fields to get a list of matching entries

Filters

You can search for issues using the various filters Xray provides.

In this tab, you will find a "Filter(s)" button that allows you to add and remove searchable fields that are available for the Issue Type being searched, and in Jira's global context. Any other custom field that is not available in the Jira global context (i.e. not available for all Projects) must be searched using the JQL tab.

If you wish, you may sort the entries in the results table by a given field: when you have a sortable field as a column in the table, you can click on the field/column name and all results will be sorted in ascending order; click it again to sort them in descending order.

The screenshot shows the Jira Software interface for adding tests to a specific test execution. The sidebar on the left contains navigation links for Summary, Issues, Reports, Components, Xray Reports, Xray Test Reports, Xray Test Plans, and Automated Tests. The main content area is titled 'Add Tests to Test Execution CALC-1969'. It features a 'Select' tab with a 'Filter(s)' dropdown and a 'Search' button. A table of test entries is displayed with columns: Issue Type, Key, Summary, Test Type, Affects Version/s, and Created. The 'Created' column header is circled in red. At the bottom, there are buttons for 'Add selected', 'Add all (162)', and 'Cancel'.

You can also re-order the columns in the results table by dragging the column name to the desired place.

Finally, in order to add issues, you can select the issues you want by clicking on the respective checkbox and then by picking the "Add selected" button in the bottom left of the screen. If you want to add all issues, simply select the "Add all" button.

Please note that the issues will be added by the order that they were selected.
