

Cloud Editing a Test

As said in the beginning of this tutorial, Tests are Jira issues because of this "Editing" an issue will be the same as you do for standard issue types.

1

Inline Editing Xray Tests

Xray Test issue sections support inline editing similar to Jira native and custom fields inline edit. This prevents full page reloads when modifying fields.

Inline Edit Fields

To inline edit a field, just hover over the field view area and click it.

The following Test fields support inline edit:

- **Type:** The Test issue type
- **Definition:** The automated generic test definition (only visible for Generic tests)

To inline edit automated Test issues:

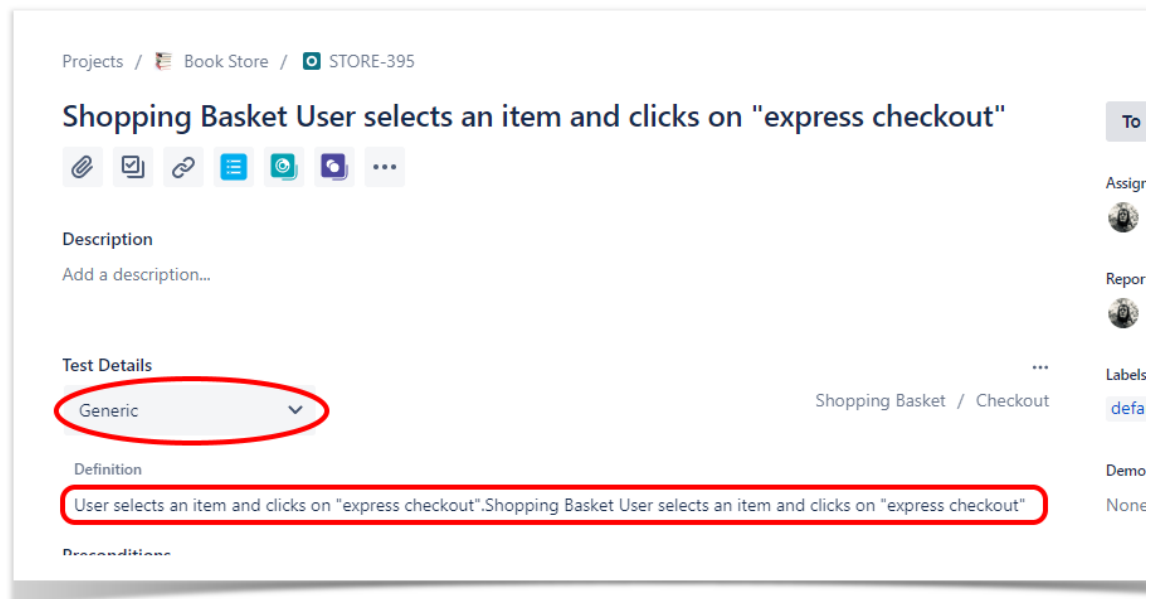

Step 1: If you are inline editing a **Cucumber** Test:

- You can hover over the actual **Test Type**, click it, and change it to another type that is available on the select box.
- You can hover over the **Scenario** field, click it, and edit its contents.

The screenshot displays the Jira Xray Test interface for a test titled "Test visitors can Login to Book Store Website". The breadcrumb navigation shows "Projects / Book Store / STORE-16". The test is currently in the "TO DO" state. The "Test Details" section shows the test type as "Cucumber", which is circled in red. Below it, the "Scenario" field is also circled in red and contains a list of steps: "1 Given I am not logged in", "2 And I am on the log in page", "3 When I enter my username", "4 And I enter my password", "5 And I click the login button", and "6 Then I am on logged in". The right sidebar shows the test's history and status, including "Assi", "Rep", "Lab", "de", "Den", "No", "Spro", "Boc", "Prio", and "Xpo".

Step 2: If you are inline editing a **Generic** Test:

- You can hover over the actual **Test Type**, click it, and change it to another type available on the select box.
- You can hover over the **Definition** field, click it, and edit its contents.

Manual Test Steps Table

To edit the steps of a Manual Test please check [this](#) page.

2

Changing the Type of a Test

When the Type of a Test is changed, the details of the previous Info along with the associated Preconditions will be lost.

Change test type to Generic

The current type info details will be deleted and all Preconditions will be removed from this Test. Do you want to continue?

Confirm

Cancel

This operation is permanent and not reversible.
