

Learning Paths

Tester

This path provides testers with an overview of how to create a Test, plan its execution, and execute and visualize how the result reflects its requirement coverage.

QA Manager

QA Managers are recommended to complete the "Tester Course" for the basics on how to create and execute tests. Then follow this path to learn how to manage, plan, and organize tests and make the most out of the reports and gadgets.

Administrator

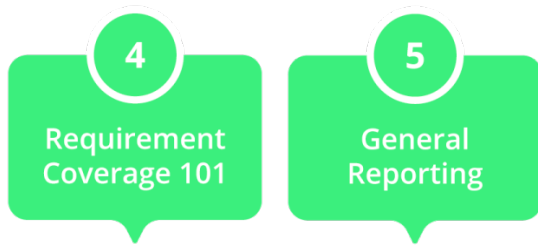

This path shows Administrators how to set up the most common type of Xray configurations and learn the essential setup items.

Tester

This path provides testers with an overview of how to create a Test, plan its execution, and execute and visualize how the result reflects its requirement coverage.

Click on the first subject to start taking the course.

QA Manager

QA Managers are recommended to complete the "[Tester Course](#)" for the basics on how to create and execute tests. Then follow this path to learn how to manage, plan, and organize tests and make the most out of the reports and gadgets.
