

# October 17, 2020 - Minor Update - v1.1.49-1.015.000

October 17, 2020

The Xray team is proud to announce the release of **Xray Cloud 1.1.49-1.015.000**. This version's major features include **Sharing the Xray built-in reports**, **Searching Test Steps** on manual Tests, a new Test Execution column showing the **Steps progress**, and **configuring Xray issue types automatically** within a project.

  - [Search Test Steps](#)
  - [Test Steps progress in Test Execution issue](#)
  - [Configure Xray issue types automatically](#)
- [And more...](#)
  - [Test Coverage](#)
  - [Test Case Importer](#)

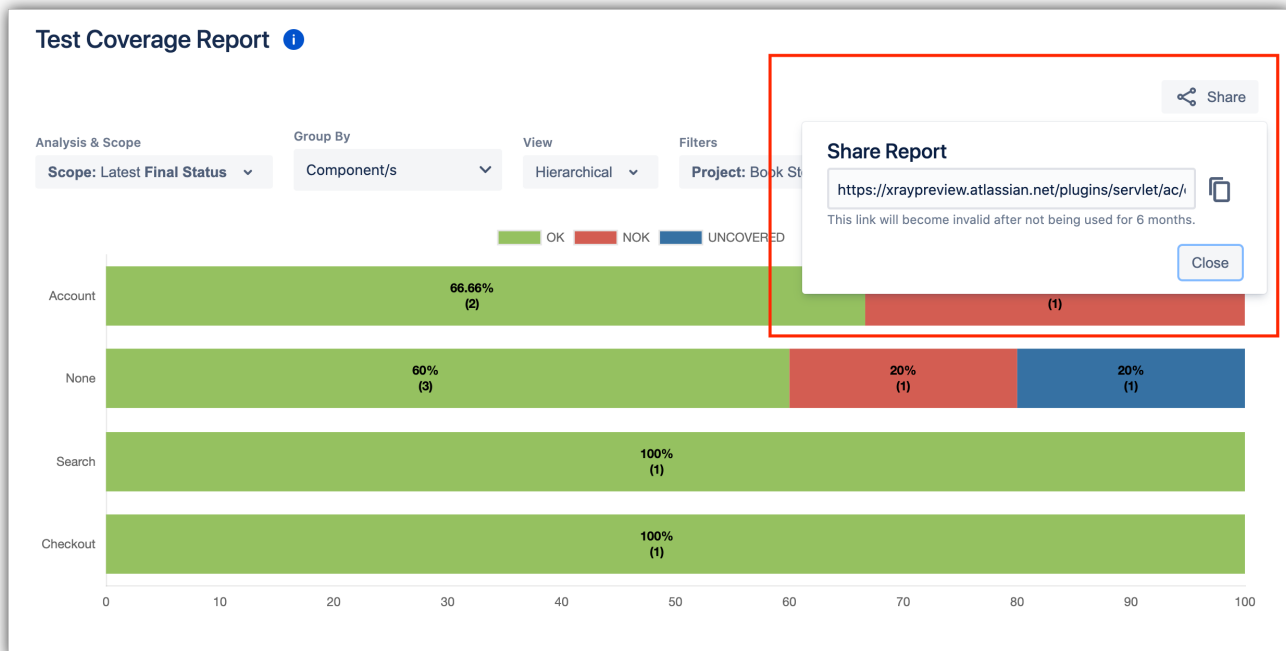

## Release highlights

### Share built-in reports 😊

Have you tried to share an Xray built-in report with a teammate and they can't seem to replicate exactly the same parameters, ending up with different results?

Worry no more. Now you can directly share the exact same report you are seeing.

Learn more [here](#).

## Search Test Steps

**Test Details**

Manual

Shopping Basket / Checkout

Edit in Dialog

Q RDBMS

+ Create Step

...

SHOWING 1 OF 12 STEPS

10

**Execution Domain**  
RDBMS

**Action**  
Execute the following database script.

**Data**  
1 SELECT \* FROM ORDERS WHERE

**Expected Result**  
This must return the database order row with the following information:

- **Status:** "PROCESSING"
- **Source:** "Backoffice"

**Attachments (0)**

+ Create Step

Searching for text within Test Steps of a manual Test case is now easier with the addition of a dedicated search field.

The browser search might not be a good solution because not all the steps are loaded at a given time due to performance reasons. Also, the steps might be collapsed.

Therefore, we have now included this search field that allows you to search in all Test Steps. This includes all Xray native fields (e.g. Action, Data, Expected Result) and also Test Step custom fields.

Learn more about this feature [here](#).

## Test Steps progress in Test Execution issue

There is a new column available for the Test Runs data table, within a Test Execution issue. This column is called **Steps Progress** and displays the relation between the number of steps that have been executed (in a final status) and the total number of steps in the Test.

This column is not visible by default. You have to configure your column layout within the Test Execution issue to display this column if needed.

- Test Run Custom Fields
- Default Column Layouts
- Re-Indexing

### Summary

This page contains a brief summary of the Xray configurations for this project.

#### Issue Types

**Xray Issue Types in Project**

There are 0 Xray issue types configured for this project. In order to enable this project for Xray, you need to configure the Xray issue types manually by going into the issue type scheme for this project and adding the Xray issue types.

[Add Xray Issue Types](#) [Configure the Issue Type Scheme manually](#)

Name	Description
 Test	This is the Xray Test Issue Type. Used to create Test issues.
 Precondition	This is the Xray Precondition Issue Type. Used to create Precondition issues. A Precondition can be associated with multiple Test issues.
 Test Set	This is the Xray Test Set Issue Type. Created by Test Execution and Test Plan. A Test Set can be associated with multiple Test issues.
 Test Plan	This is the Xray Test Plan Issue Type. Used to create Test Plan issues. Those tests displaying the latest result for the Test Plan.
 Test Execution	This is the Xray Test Execution Issue Type. Used to create Test Execution issues.
 Sub Test Execution	This is the Xray Sub Test Execution Issue Type. Used to create Sub Test Execution issues. A Sub Test Execution issue is a child of a parent issue like a requirement in order to track the execution of a specific step.

#### Miscellaneous

It is now possible to associate the Xray issue types with a project automatically.

Before, you would need to go into the project's issue type scheme and add the issue types manually.

Now you just click a button and this is done automatically by Xray with the Xray project settings.

## And more...

### Test Coverage

- [XRAYCLOUD-1098](#): When creating a test from a requirement, if the requirement has attachments in its Description, they should also be moved to the Test.

### Test Case Importer

- [XRAYCLOUD-1320](#): As a user, I want to import Sprints information via CSV using Xray's Test Case Importer.
