

Test Runs Summary Gadget

This gadget provides a summary of the filtered Test Runs, in chart or table layout, showing the amount of Test Runs per status, grouped by a given Test or Test Run field.

Test Runs Summary
By Xpand-IT • Local

Add gadget

Test Runs Summary chart/table for showing the amount of test runs per status, grouped by a given test or test run field.

[Show XML link](#)

Purpose

This gadget enables you to see the overall status of a group of scheduled/executed test runs (e.g., from a Test Plan) in order to evaluate the testing effort.

Some possible usage scenarios:

- analyze the Test Runs from a Test Execution
- analyze the Test Runs from all Test Executions belonging to a Test Plan
- depict the testing results for a given component, in the context of a Test Execution or Test Plan
- see how the testing is progressing in terms of scheduled runs, from the Test Run assignee perspective
- see how the testing is progressing in terms of scheduled runs, based on the Test priority
- see how failures, or some other test run statuses, are impacting components
- analyze the Test Runs of a given Test Environment

How to use

Source Test Runs for the chart can be indirectly provided using a saved filter, which may be used in conjunction with Test Run-specific filters:

- **Saved filter:** a saved filter containing Test Execution issues; This field is mandatory
- **Date range:** only Test Runs with start date and end date between the selected range will be considered
- **Test Run Filters:**
 - **Assignee:** assignee of the Test Run
 - **Current User:** option to choose dynamically the current user logged in as the selected user when sharing dashboards with others. Please note that in confluence, the current user will always be the user that owns the connection between Confluence and Jira.
 - **Status:** status of the Test Run
 - **Priority:** priority of the Test associated with the Test Run

Tips

- In order to see the relevant Test Runs by filtering Test Execution issues, you may take advantage of existing [JQL functions](#) and/or take into account the fields associated with the Test Execution
- Below is an example of filtering by Test Environment:

```
project = CALC and issuetype = "Test Execution" and "Test Environments" = "Android"
```

Additional configuration parameters for this gadget include:

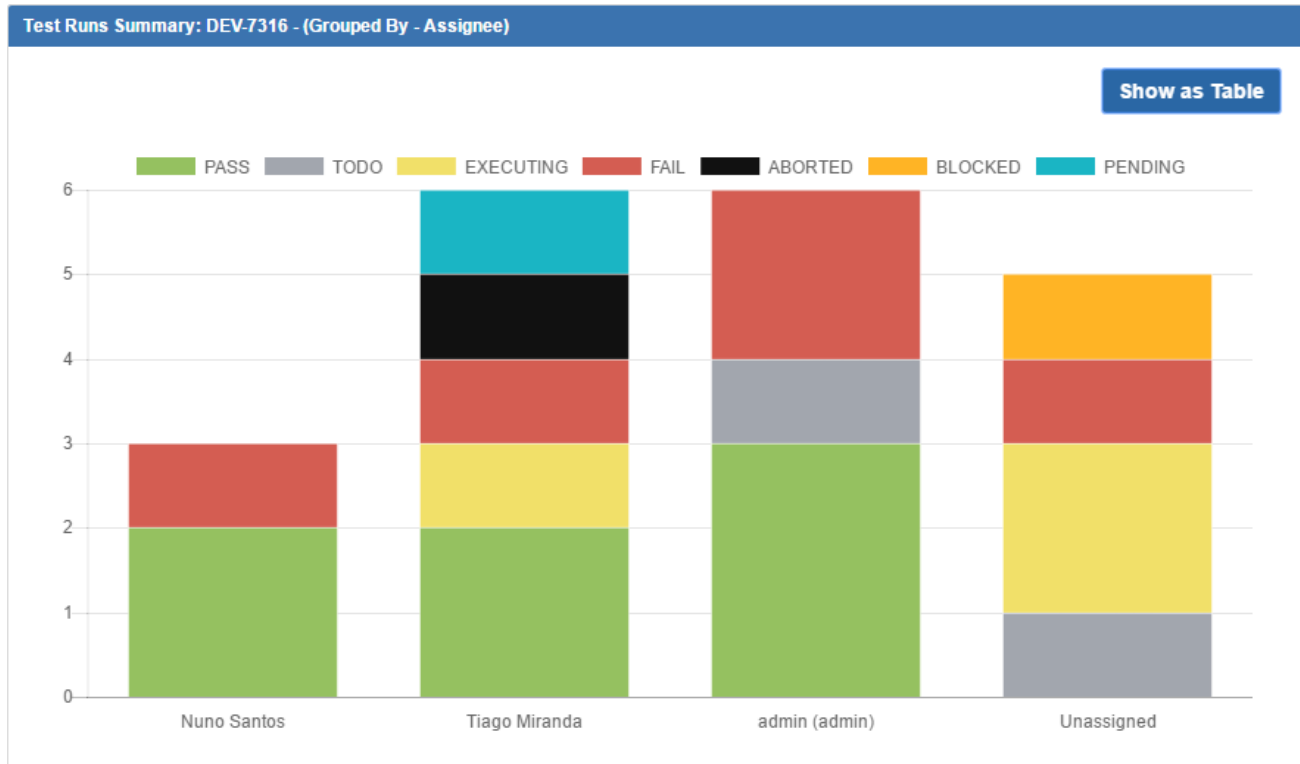

- **Custom Title:** custom title for the gadget, if the appropriate checkbox is enabled; otherwise, a default title is used
- **Group By:** group the results by the Test Run assignee, Test Run executed by, Test component, Test Key, label or priority. You can also group by Custom Fields. the supported custom field types are
 - [Date Picker](#)
 - [Number Field](#)
 - [Radio Buttons](#)
 - [Select List \(multiple choices\)](#)

- Select List (single choice)
- Text Field (single line)
- URL Field
- User Picker (single user)
- Xray's "Test Type"
- Xray's "Cucumber Test Type"

Note that the custom fields must be in the Test context or in the global context.

- **Refresh Interval:** how often the gadget is updated

When viewing the result, you can switch between a bar chart or a table layout.

Test Runs Summary: DEV-7316 - (Grouped By - Assignee)

Show as Chart

	PASS	TODO	EXECUTING	FAIL	ABORTED	BLOCKED	PENDING	Total
Nuno Santos	2	0	0	1	0	0	0	3
Tiago Miranda	2	0	1	1	1	0	1	6
admin	3	1	0	2	0	0	0	6
Unassigned	0	1	2	1	0	1	0	5
Total	7	2	3	5	1	1	1	20

Showing 1 to 4 of 4 entries
