

Integrations

Xray easily integrates with other tools, whether you are implementing continuous integration on your system or simply want to obtain some data from Xray. This is possible thanks to its REST API.

Xray also provides integration with Confluence so you can easily embed useful dashboards such as the requirement coverage gadget.

Continuous Integration

- [Continuous Integration tools](#)
- [Integration with Bamboo](#)
- [Integration with Jenkins](#)
- [Integration with TeamCity](#)
- [Integration with GitHub](#)
- [Integration with GitLab](#)
- [Integration with CircleCI](#)
- [Integration with Azure DevOps](#)
- [Integration with Maven](#)
- [Integration with Travis CI](#)

Integration with other tools

- [Integration with Confluence](#)
- [Integration with Xporter](#)
- [Integration with Structure](#)
- [Integration with eazyBI](#)
- [Integration with Apwide Golive](#)
- [Integration with Bulk Clone](#)
- [Integration with Automation for Jira](#)
- [Integration with ScriptRunner](#)
- [Integration with Xray Exploratory App](#)
- [Integrations from the community and other products](#)

Not found what you were looking for?

- Are you looking for importing or exporting tests to CSV or other tools? Please see [this page](#).
- If you need to import test results, see [this page](#) instead.
- Or maybe you want to create [custom reports in PDF, Word, Excel files](#)?

Feel free to contribute!

Xray is used and integrated with many different platforms, so if you have the time and know-how, feel free to contribute an API implementation in your preferred language (e.g., Java, .NET, JavaScript, etc). We'd be happy to include links to your contribution 😊
