# [Xray] Import via Test Case Importer, Test Step attachment whose name contains spaces
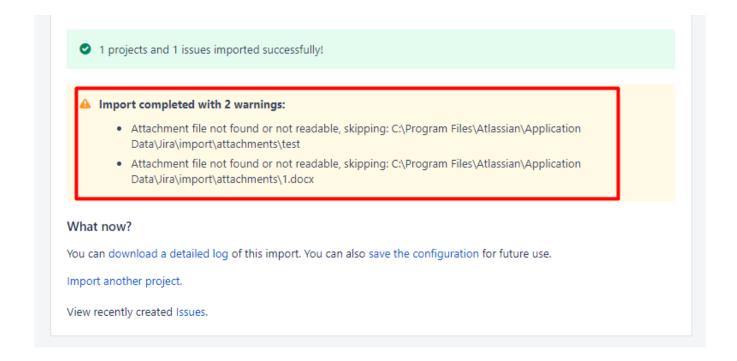

Problem

If your Test Step attachments contain spaces in their names and the CSV has the exact same name, Xray will not import the attachments.

Please see the example below:

```
1  TCID;Summary;Step/Action;Data;Expected Result;Test Step Attachment
2  1;New Test with Test Step Attachment; verify if the import succeeds;;;test 1.docx
3
```

Nome	Data de modificação	Tipo	Tamanho
AMGT-1931 (11)	05/02/2021 09:33	Adobe Acrobat Document	20 KB
CSVConverter Server_attachments_V1	16/02/2021 14:44	Microsoft Excel Worksheet	14 KB
issues (4)	16/02/2021 14:45	Microsoft Excel Worksheet	12 KB
test 1	24/02/2021 14:24	Microsoft Word Document	104 KB

When importing, you'll see the message below:

✓ 1 projects and 1 issues imported successfully!

⚠ **Import completed with 2 warnings:**

- Attachment file not found or not readable, skipping: C:\Program Files\Atlassian\Application Data\Jira\import\attachments\test
- Attachment file not found or not readable, skipping: C:\Program Files\Atlassian\Application Data\Jira\import\attachments\1.docx

What now?

You can download a detailed log of this import. You can also save the configuration for future use.

Import another project.

Solution

To overcome this situation, please replace all spaces by **%20** on the CSV.

```
1  TCID;Summary;Step/Action;Data;Expected Result;Test Step Attachment
2  1;New Test with Test Step Attachment; verify if the import succeeds;;;test%201.docx
3
```

Then the import will succeed!
