

# [Xray Cloud] Requirement is UNCOVERED

## Problem

The requirement is shown as UNCOVERED.

Projects / PMAX\_SCRUM / PMAXS-1470

### My first Requirement

Attach Create subtask Link issue Test Coverage

Description  
Add a description...

Test Coverage

UNCOVERED

No Tests are associated with this issue.

Add Tests

## Preliminary check

Is the link direction correctly configured?

Requirement link: "is tested by" Xray Test case

Xray Test case link: "tests" Requirement

## Solution

If the direction is correctly set up, check if the *Linked Issues* custom field is hidden:

Issues Search Jira admin

### View Field Configuration

SHARED BY 9 PROJECTS

The table below shows all fields configured in Jira and their properties for **Default Field Configuration**.  
You can use this page to make fields required, hide/show fields and specify their description. You can also change the screens the field appears on by using the "Screens" link next to each field.  
• [View all field configurations](#)

Linked Issues

Name	Screens	Actions
Linked Issues	<ul style="list-style-type: none"><li>AMPR: Kanban Bug Screen</li><li>AMPR: Kanban Bug Screen (1)</li><li>AMPR: Kanban Default Issue Screen</li><li>AMPR: Kanban Default Issue Screen (1)</li><li>AMPR: Xray Default Test Screen(1 link issue)</li></ul>	Edit Show

Linked Issues field cannot be hidden

The *Linked Issues* must be visible. If it is hidden, Jira does not send Xray the link information, and so Xray cannot know that the Requirement is linked with an Xray Test Case.

Make the *Linked Issues* visible.
