Enhanced querying with JQL

- JQL Functions Custom Fields

JQL Functions

The following JQL functions are available for querying Xray issues in the Issue Search Page. They enable you to query the relationships between Xray issue types.

testExecutionTests

JQL Function	Parameters	Description	Example	
testTestSet	P1 - Test Issue Key	Returns a list of Test Set issues associated with the input Test issue key.	<pre>issuetype = 'Test Set' and key in testTestSet('DEMO-1')</pre>	
testSetTests	P1 - Test Set Issue Key /Filter of Test Sets	Returns a list of Test issues associated with the input Test Set issue key.	<pre>(1) issuetype = 'Test' and key in testSetTests ('DEMO-5') (2) issuetype = 'Test' and key in testSetTests('Test sets saved filter')</pre>	
testsWithN oTestSet	P1 - Saved filter Name /ID	Returns a list of Test issues not associated with a Test Set.	<pre>(1) issue in testsWithNoTestSet() (2) issue in testsWithNoTestSet("saved_filter")</pre>	
testPreCon ditions	P1 - Test Issue Key	Returns the Pre-Condition issues associated with the input Test issue key.	<pre>issuetype = 'Pre-Condition' and key in testPreConditions('DEMO-1')</pre>	
preConditi onTests	P1 - Pre-Condition Issue Key	Returns the Test issues associated with the input Pre- Condition issue key.	<pre>issuetype = 'Test' and key in preConditionTests('DEMO-1')</pre>	
testRequire ments	P1 - Test Issue Key /Filter name of Tests	Returns a list of Requirement issues associated with the input Test issue key/Filter of tests.	<pre>(1) issuetype = 'Feature' and key in testRequirements('DEMO-1') (2) issuetype = 'Feature' and key in testRequirements('Tests saved filter')</pre>	
requiremen tTests	P1 - Requirement Issue Key/Filter of Requirement Issues	Returns a list of Test issues associated with the input Requirement issue key or saved filter with Requirements.	<pre>(1) issuetype = 'Test' and key in requirementTests('DEMO-10') (2) issuetype = 'Test' and key in requirementTests('Requirements saved filter')</pre>	

testsWithR eqVersion	P1 - Project Name/Key /Id	Returns a list of Test issues associated with the Requirement issues of the input Fix Versions of the specified project.	issuetype = 'Test' and issue in	
	P2 - Fix Version			
	P3 - Fix Version		testsWithReqVersion('DEMO', 'v1.0', 'v1.1')	
	(Optional)		VI.U', 'VI.I /	
	Pn - Fix Version (Optional)			
testsWithT	P1 - Project Name/Key	Returns a List of Test issues associated with the Test Set	issuetype = 'Test'	
estSetVersi on		issues of the input Fix Versions of the specified project.	and issue in	
	P2 - Fix Version		testsWithTestSetVersion('DEMO',	
	P3 - Fix Version (Optional)		'v1.0', 'v1.1')	
	Pn - Fix Version (Optional)			
testExecuti	P1 - Test Execution	Returns a List of Test issues associated with the input Test	(1)	
onTests	Issue Key/Id or Filter ID	Execution issues from <i>P1</i> optionally filtered by the current test run status for each Test issue.	issuetype = 'Test'	
	P2 - Test Run Status list separated by " "	Parameter <i>P1</i> can either be a single Test Execution issue key,	and issue in testExecutionTests('DEMO-9')	
	(pipe) (Optional)	an ID or a saved filter containing multiple Test Execution issues.	(2)	
	P3 - User assigned to execute Test Run	Possible Test Run Status values are: PASS, FAIL,	issuetype = 'Test'	
	(Optional).	EXECUTING, ABORTED, TODO and all custom statuses.	and issue in testExecutionTests('DEMO-9',	
	P4 - Defects Flag with value in true or false	P3 corresponds to the user assigned to execute the Test Run,	'PASS')	
	(optional).	while P5 corresponds to the one who actually executed it. For analyzing the joint values of all Test Run Assignees, "" should	(3)	
	P5 - User who	be used. For taking into account the Test Runs without any Assignee, then "NULL" should be used.	issuetype = 'Test'	
	executed the Test Run (optional).	If you pass true as the value for P4, the query returns all Tests	and issue in testExecutionTests('DEMO-9',	
	P6 - Existence of	from a particular set of Test Executions where no Defects were created.	'PASS',	
	comments (needs to be true or false)	mments (needs to be e or false) - Existence of		
	P7 - Existence of evidences (needs to be		'user A')	
	true or false)		(4)	
	P8 - Started from (symbols >/< are read		issuetype = 'Test'	
	as bigger or exactly/sm aller or exactly, the sign		and issue in testExecutionTests(
	= or the full absense of signs is read as exactly)		'Saved Test Execution Filter',	
	P9 - Finished On (symbols >/< are read		'PASS')	
	as bigger or exactly/sm		(5)	
	aller or exactly, the sign = or the full absense of		issuetype = 'Test'	
	signs is read as exactly)		and issue in testExecutionTests(
			'Saved Test Execution	
			Filter',	
			···,	
			'user A')	
			(6)	
			issue in testExecutionTests(
			'Saved Test Execution	
			Filter',	
			",	
			'user A', 'true')	
			(7)	
			issue in testExecutionTests(
			'Saved Test Execution	

				",", 'false', 'admin')
			(8)	
			issuetype = 'Test'	
			and issue in testExecutionTests(
			'CALC-397	,
			",	
			",	
			'false',	
			",	
			'true',	
			'false',	
			'>2016-05-	31',
			'<2016-06-	30')
testsWitho utTestExec	P1 - Saved filter Name /ID	Returns a list of Tests that are not associated with a Test Execution to be executed	(1)	
ution	/ID	Execution to be executed	<pre>issuetype = Test and issue in testsWithoutTestExecution()</pre>	
			(2)	
			<pre>issuetype = Test and issue in testsWithoutTestExecution("saved_fil</pre>	ter")

requiremen

P1 - Status list separated by "|"(pipe)

P2 - Project (Optional)

P3 - Version to calculate requirement status (Optional)

P4 - Test Environment (Optional)

P5 - Flat (Optional)

P6 - ToDate (Optional)

P7 - Saved Filter (Optional)

Returns a list of Requirement Issues with the provided coverage status.

Please provide *Project* parameter (P2) to restrict the requirements to the specified project.

If analyzing on a specific version, then the *Project and Version* parameters must be filled.

Optional filters include:

Test Environment, for taking into account the Test Executions made for that environment. For analyzing the joint values of all environments, "" should be used. For taking into account the Test Executions without any Test Environment assigned, then "__NULL__" should be used.

Flat that indicates whether all Requirements (not only parents) should be searched. If "Flat" is not provided, the default value is 'false'.

ToDate considers only those requirements executions before a specific date/time (the date literal must follow the ISO8601 format).

Saved Filters considers only requirements from that specific filter.

(1)

issue in requirements('OK','Calculator')

Please note

Although optional, it is highly recommended to specify the *Project* parameter as means to define the project having the requirments and thus reduce the amount of issues that will be processed /returned. Otherwise, requirements from *all* JIRA projects will be processed, which possibly is something that you don't want or need at all.

```
priority = Major and fixVersion <= 'v3.0' and
   issue in requirements('NOK', 'Calculator',
'V4.0')
(3)
issue in
   requirements('NOK', '', '', '', '', '2014-
01-01')
(4)
issue in
   requirements('OK',
              'Calculator',
              'v1.0',
              'chrome'
              'false'
              '2014-08-30')
(5)
issue in
   requirements('NOK',
              'Calculator',
              'v2.0',
              'true')
(6)
issue in
    requirements('NOK',
                  'Calculator',
                  'v2.0',
'chrome',
                  'false',
                  'Requirements saved filter')
```

requiremen	P1 - Status list	Returns a list of Requirement Issues with the coverage status	(1)	
tsWithStat usByTestPl	separated by " "(pipe)	calculated for the given Test Plan issue.	issue in

If you use status parameter then user is required	<pre>issuetype = 'Test Execution' and issue in testExecWithTestRunsAssignedToUser() (2) issuetype = 'Test Execution' and issue in testExecWithTestRunsAssignedToUser ('userDPC') (3) issuetype = 'Test Execution' and issue in testExecWithTestRunsAssignedToUser ('userDPC', "FAIL") (1) issuetype = 'Test Set' and issue in testSetPartiallyIn('DEMO-15') (2) issuetype = 'Test Set' and issue in testSetPartiallyIn('testExecList') (3)</pre>

testPlanTe	P1 - Test Plan Key/Filte r of Test Plans P2 - Status (Optional) P3 - Environment (Optional)	Returns a list of tests that are associated with the test plan. The "status" parameter is optional and allows to filter Test issues in a specific Plan with the specified execution status. If the "status" parameter is present, users might also pass the "environment" parameter. If this parameter is filled, Xray will provide all Tests in a Test Plan that are in the specified "status" and for the specified "environment".	<pre>issuetype = 'Test Set' and issue in testSetFullyIn('testExecList') (3) issuetype = 'Test Set' and issue in testSetFullyIn('testPlanList') (1) issue in testPlanTests("DEMO-10") (2) issue in testPlanTests("Test Plans saved filter", "TODO") (3) issue in testPlanTests("DEMO-10", "TODO","IOS") (4) issue in testPlanTests("DEMO-10","TODO","IOS") A When searching for Tests with a certain status inside a Test Plan, we recommend you to use the custom field search instead. Xray has created a new way of searching with big improvements when filtering by test status, using the Custom Fields: (3) issuetype = Test and TestRunStatus = "DEMO-10 - TODO" (4) issuetype = Test and TestRunStatus = "DEMO-10 - TODO" (6) issuetype = Test and TestRunStatus = "DEMO-10 - TODO environment:IOS"</pre>
testPlanTe stExecutio	P1 - Test Plan Key /Filter of Test Plans	Returns a list of test executions that are associated with a Test Plan or a saved filter of Test Plans.	(1)
ns		The state of the s	<pre>issue in testPlanTestExecutions("DEMO-10") (2) issue in testPlanTestExecutions("Test Plans saved filter")</pre>
testPlanRe quirements	P1 - Test Plan Key/Filte r of Test Plans	Returns the Requirement issues that are indirectly associated, through Test issues, with a Test Plan or a saved filter of Test Plans.	<pre>(1) issue in testPlanRequirements("DEMO-20") (2) issue in testPlanRequirements("Test Plans saved filter")</pre>

testReposit oryFolderT ests	P1 - Project Key P2 - Folder Path P3 - Flatten (Optional)	Returns the list of Tests contained in a folder (P2) of the Test Repository of a Project (P1) May optionally include the Tests in sub-folders by setting Flatten (P3) to "true".	(1) issue in testRepositoryFolderTests("CALC", 'Parent/Child') (2) issue in testRepositoryFolderTests("CALC", 'Parent/Child', "true")
testPlanFol derTests	P1 - Test Plan Key P2 - Folder Path P3 - Flatten (Optional) P4 - Test Run Status (Optional) P5 - Test Environment (Optional)	Returns the list of Tests contained in a folder (P2) of a Test Plan (P1). May optionally include the Tests in sub-folders by setting Flatten (P3) to "true". Can also filter by Tests Run Status (P4) for a given Test Environment (P5). To analyze the joint values of all Test Environments, "" should be used. To analyze the Test Executions without any Test Environment assigned, then "NULL" should be used.	(1) issue in testPlanFolderTests(CALC-10, 'Parent/Child') (2) issue in testPlanFolderTests(CALC-10, 'Parent/Child', "true") (3) issue in testPlanFolderTests(CALC-10, 'Parent/Child', "true", "TODO FAIL", "windows")
projectPare ntRequire ments	P1 - Project Key	Returns the list of Requirement issues, from a given Project, which are not Sub-requirements	(1) issue in projectParentRequirements("CALC")

Custom Fields

Xray also provides custom fields to allow more refined queries when searching for issues.

JQL Function	Issue Type	Description	Example
Test Type	Test	The Test type: Manual; Cucumber; Generic	issuetype = 'Test' and "Test Type" = "Manual"

TestRunSt Test This is a calculated custom field that provides the latest Test Run status based on the current "Test issuetype = 'Test' atus Run Status Version Strategy" option configured in the Xray administration. and TestRunStatus in ("FAIL", "ABORTED") <u>Syntax</u>: TestRunStatus = "[Group (version or TestPlan)] - [Status] environment:[environment]" issuetype = 'Test' Only the Status is mandatory; if only the status is provided, Xray will assume you are searching for the and TestRunStatus = "PASS" Xray will lookup for all Tests with Status in that particular version and environment. Read more about Status and environments. issuetype = 'Test' and TestRunStatus = Test Run Status (ii) "TESTPLAN-123 - PASS" The latest Test Run Status is calculated based on the latest final Test Run (i.e., latest finish date) or, in case there are no final Test Runs, the latest non-final Test Run (i.e., latest start date). Please see the custom fields preferences page. issuetype = 'Test' and TestRunStatus = "FAIL environment: Android" issuetype = 'Test' and TestRunStatus = "v3.0 - PASS environment: Android" issuetype = 'Test' and TestRunStatus = "TESTPLAN-123 - PASS environment:Android" issuetype = 'Test' and TestRunStatus is EMPTY Requireme Require This is a calculated custom field that provides the requirement coverage status. issuetype = 'New Feature' nt Status ment and "Requirement Status" = "OK" Possible status values are: OK - All tests passed the requirement NOK - At least one test failed issuetype = 'New Feature' NOTRUN - At least one test did not run and "Requirement Status" in ("NOTRUN", UNCOVERED - The requirements is not associated with tests "UNCOVERED") testTestExecutions issuetype = 'New Feature' Syntax: "Requirement Status" = "[Group (version or TestPlan)] - [Status] environment:[environment]" and "Requirement Status" = "v1.0 - OK" Only the Status is mandatory; if only the status is provided, Xray will assume you are searching for the latest execution issuetype = 'New Feature' Xray will lookup for all Requirements with Status in that particular version and environment. and "Requirement Status" = "v1.0 - OK Read more about Status and environments. environment:Android" Requirement Coverage

For more information, please check out our page dedicated to requirements coverage.

If the Requirements Coverage Strategy depends on the version, then you must also include the actual version name and the status when you do the search. The syntax: "[version]

name] - [status]"

Steps Count	Test	The number of Steps in a Manual Test	issuetype = 'Test' and "Steps Count" = 3
Manual Test Steps	Test	Find Tests by text present in the Manual Test Steps fields	issuetype = 'Test' and "Manual Test Steps" ~ "Login with user administrator"

The Test Set Status and Test Plan Status custom fields, mentioned in Custom Fields, are not queryable.
