

# [Xray Cloud] "Closed" Defects still appear as "Open" in Xray's Built-in Reports

Do you have an Execution Defect that is already "Closed" showing as "Open" in an Xray Built-in Report?

| Linked Defects |        |
|----------------|--------|
| Open           | Closed |
| 1              | 0      |

✓ Done

Xray reports consider a "Closed" issue when the issue's **Resolution** is set; if not, Xray has no way of knowing which workflow statuses define the resolved issues. So please check if your Defects have the Resolution set.
