

# 1.8.0 Release Notes

The Xray team is proud to announce **Xray Exploratory App** for Windows, Mac, and Linux version **1.8.0**.

This version is all about compatibility improvements with different Xray for Jira configurations. What's new?

## Release highlights

- The app now supports Tests and Test Executions that doesn't have a Summary field defined
- Added support for Xray/Jira configuration without sub-Test Executions defined
- Improved support for code languages markup in the descriptions and comment fields
- Improved support for fix versions in exported PDF reports
- Fixed more than 20 small bugs reported
- Please keep reporting all the problems you face to our amazing support team. We will fix them. 😊
