

1.7.3 Release Notes

The Xray team is proud to announce **Xray Exploratory App** for Windows, Mac, and Linux version **1.7.3**.

This version is all about **speed** improvements and bug squash. Also, now you have more flexibility when creating new defects, a new field available: Multiversion. What's new?

New installation requirements

Note that since version **1.4.0**, the Exploratory App **requires Jira Server and Data Center version 8.4.0 or higher**.

Release highlights

- Now you can create issues multi-version custom fields during test sessions
- Major speed improvements on all screens, the app now loads faster and changes screens faster.
- Please keep reporting all the problems you face to our amazing support team. We will fix them. 😊
