

1.4.0 Release Notes

The Xray team is proud to announce **Xray Exploratory App** for Windows, Mac, and **Linux** version **1.4.0**.

Do you like Linux? Do you have complex workflows on Jira? Do you depend on multiple issue fields? Do you have custom or mandatory Jira fields for reporting defects or creating new test cases? Do you use many notes and categories? Well, it took us some time, but now you can do all that. So, what's new?

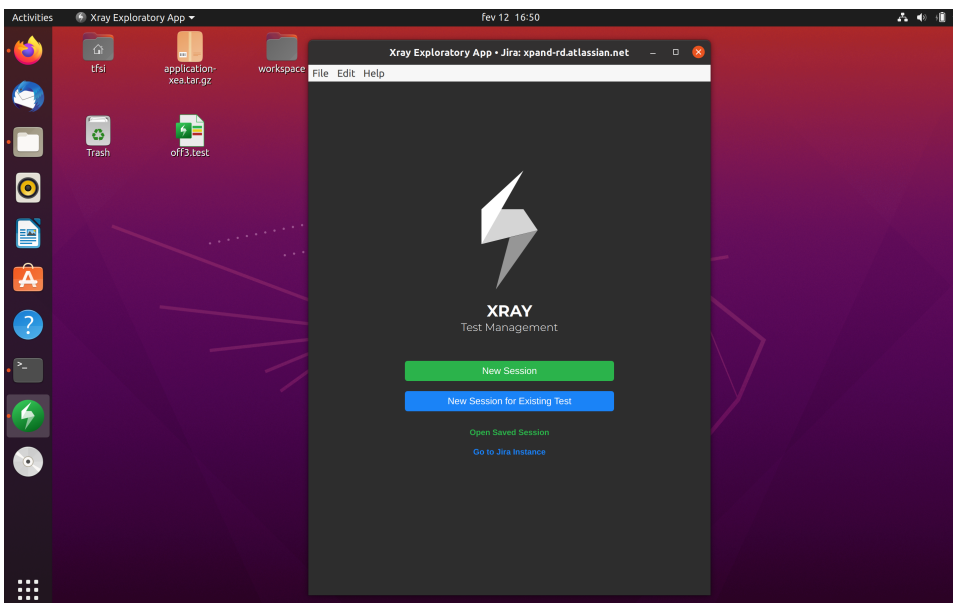

New installation requirements

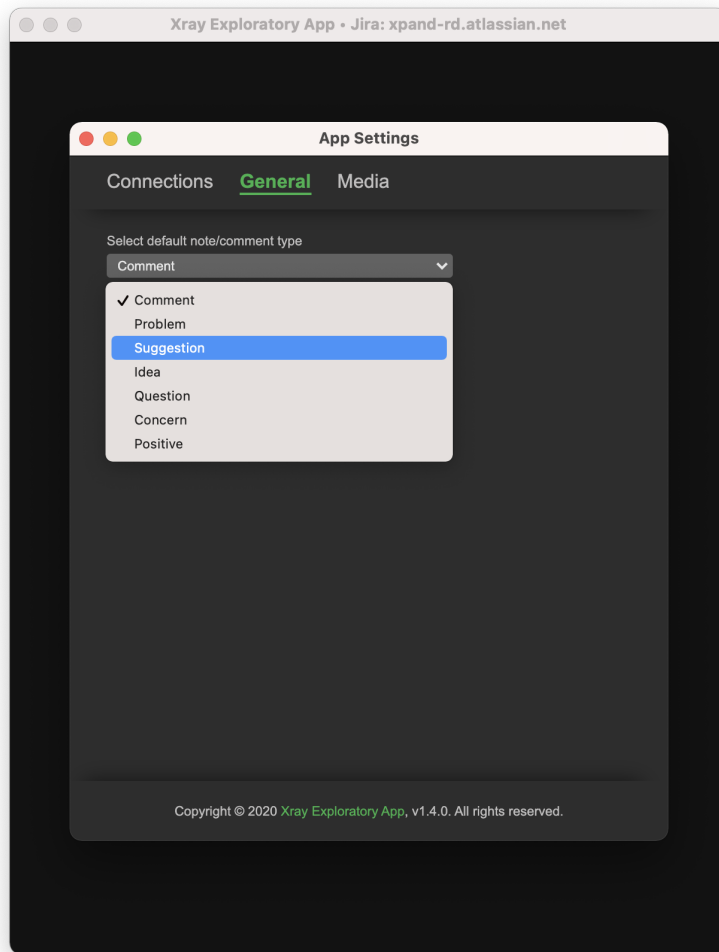

Starting with version **1.4.0**, the Exploratory App **requires Jira Server and Data Center version 8.4.0 or higher**.

Release highlights

- We listen to your requests, so now available for Ubuntu Linux. [Check here how to install](#).

- Define the default comment type in the app Settings

- Added support for more Jira system fields:
 - Priority
 - Components

- Labels

The screenshot shows the 'Xray Exploratory App' window with the 'Test' tab selected. The interface includes the following fields and controls:

- Summary***: A text input field containing 'Issue Summary'.
- Description**: A rich text editor with a toolbar (Aa, B, I, ..., A, list, +) and a text area containing 'Issue description'.
- Fix versions**: A dropdown menu with 'Select an option' and a plus icon.
- Affects versions**: A dropdown menu with 'Select an option' and a plus icon.
- Priority**: A dropdown menu with 'Medium' and a downward arrow.
- Components**: A dropdown menu with 'Add component' and a downward arrow.
- Labels**: A field containing two labels, 'Hello' and 'Labels', each with a red 'x' icon to remove it.
- Test Type**: A dropdown menu with 'Generic' and a downward arrow.
- Charter (Test Definition)**: A rich text editor with a toolbar (Aa, B, I, ..., A, list, +) and a text area containing 'Describe your test charter, including its mission and areas/features to be tested. A possible format could be: Explore <area, feature, risk>'.
- Start session**: A button with a play icon and the text 'Start session'.
- Footer**: A lightning bolt icon with the text 'Xray' and a timer showing 'Time 00:00:00'.

- Added support for Jira/Xray mandatory fields
- Added support for Jira custom field
- All the new fields support are available when creating new Xray issue types, Defects, or any Jira issue
- Disconnect from any Jira instance without the need to switch to it before
