1.3.1 Release Notes

The Xray team is proud to announce the release of **Xray Exploratory App** for Windows and Mac version **1.3.1**.

Last release (v1.3.0), we launched the support to use multiple Jira environments during your testing workflows. So, this new version is all about refinement. We improved and fixed many use cases and dead ends related to Jira instances switching. We even added a new option to auto-switch instances when loading a .TEST file or Test Execution from Jira.
